# SUMMARY OF PROGRESS ON 2020-21 AUDIT

## Summary

The purpose of this report is to provide the Audit Committee with an update on the progress of our audit on the Council's 2020/21 financial statements. The majority of our work on the Council's finance statements is now substantially complete. However, a small number of matters related to the valuation of property plant and equipment assets remain unresolved, and we have out a summary of these below.

## Outstanding issues

### **1. Other Land and Buildings valued at Depreciated Replacement Cost (DRC) (Gross book value £53.38m, net book value £53.29m)**

Comprising leisure centres, crematorium, public conveniences and seafront shelters valued on the basis of their DRC using gross internal area (GIA), estimated rebuild costs, and land value. This valuation is then reduced to reflect the age and remaining useful economic life of the building.

Page 2  
For assets valued on the basis of their DRC, the Council have been unable to provide us with floor plans to enable us to test the GIAs used in determining the valuation of these assets. Existing floor plans were not retained by the Council and remain with the Council's previous valuers. The GIAs are key inputs to the valuation of these assets and in the absence of these floor plans, we have insufficient evidence on which to test the valuation of these assets. We will discuss with the Council what further evidence the Council can provide to support the valuation of these assets.

### **2. Infrastructure assets (Gross book value £56.3m, net book value £36.9m)**

These assets consist of coastal protection schemes. The Council have provided historic cost records to support the gross book value, and then depreciated these assets over an estimated 20-year useful economic life.

To support the estimated useful life of these assets, the Council have provided evidence from an external third party, supplemented by a sensitivity analysis. We are in the process of reviewing the information provided.

# APPENDIX 1 - NATIONAL PICTURE

 To provide further context for Members we have set out below a summary of the Issues that have contributed to the delay in completion of local authority audits, and the position on audit sign-offs across all local authority audits for all suppliers.

- ▶ Backlog initially created during Covid and lockdown that has not been recovered
  - ▶ Enhanced quality requirements following well publicised audit failures within the private sector
  - ▶ Implementation of new auditing standards
  - ▶ Infrastructure accounting and inadequate historical records for highways and infrastructure spend
  - ▶ Increased complexity of group structures, nature of transactions, and asset ownership, including the acquisition of investment property for income generation purposes (though we recognise that this specific point does not apply to the Council)
- Difficulty recruiting auditors to the sector.

## Redmond review

Limited progress has been made against the Redmond review recommendations to improve local public audit. The Financial Reporting Council (FRC) has recently taken on the role of shadow system leader and a memorandum of understanding setting out the FRC's responsibilities in this role was agreed with DLUHC in March 2023.
