TOWN AND COUNTRY PLANNING ACT 1990

APPLICATION NO: 19/00806/FUL

DATE REGISTERED: 30th July 2019

Proposed Development and Location of Land:

**Replace existing shed roof with Mansard style roof.
9 Primrose Road Holland On Sea Clacton On Sea Essex**

THE TENDRING DISTRICT COUNCIL AS LOCAL PLANNING AUTHORITY **HEREBY REFUSE PLANNING PERMISSION** in accordance with the application form, supporting documents and plans submitted for the following reason(s)

- 1 The National Planning Policy Framework attaches great importance to the design of the built environment and confirms good design is a key aspect of sustainable development, is indivisible from good planning, and should contribute positively to making places better for people. It is important to plan positively for the achievement of high quality and inclusive design for all development, including individual buildings. Permission should be refused for development of poor design that fails to take the opportunities available for improving the character and quality of an area and the way it functions.

The adopted Tendring District Local Plan (2007) Policies QL9, QL10 and QL11 seek to ensure that all new development makes a positive contribution to the quality of the local environment and protects or enhances local character. Policy SPL3 of the Tendring District Local Plan 2013-2033 and Beyond Publication Draft (June 2017) carries forward the sentiments of these saved policies.

The shed subject to this application is located on the southern boundary of the site. The roof alteration to change the modest shallow pitch roof to a mansard roof would result in an increased roof height of 1m, giving a maximum height of 3.5m. The choice of a mansard roof would also result in an increase to the size of the gable ends. Combined with the increased height this would give rise to a bulky, highly prominent building on the boundary of the site, directly adjacent to the footpath. The alterations would not be screened by the boundary fence; they would be visible above the fence line, and would be a highly prominent feature within the street scene to the detriment of the visual amenity of the area. The proposed roof material will also make the development appear as a prominent feature within the street scene, which is considered inappropriate in its setting.

Overall, the development is considered to be an unacceptable addition to a currently

modest outbuilding and due to the corner plot position of the application site the development would have an adverse impact on the street scene and the visual amenity of the area, contrary to the aims and aspirations of the aforementioned local and national policies.
