# Working Differently - Neighbourhood Teams

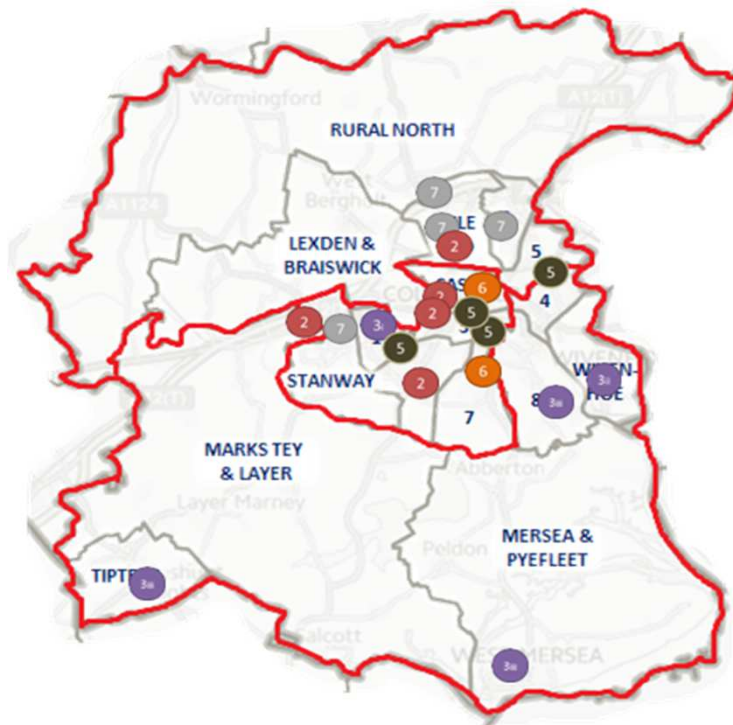

We have set ourselves a bold and challenging goal; to create a number of functioning, multi-agency/multi-disciplinary teams in North East Essex – who are empowered and supported to deliver the Live Well outcomes in their neighbourhood.

In November 2018, NEE Alliance System Executive Group agreed the following principles for these Neighbourhood Teams:

- Cover populations of around 50,000
- Follow ward and district boundaries
- Be practical and make sense for communities (eg geography, rural/urban, road networks)
- As far as possible, be sympathetic to the new primary care groupings
- As far as possible, be sympathetic to other key partners' operating models (eg police)

# Neighbourhood Boundaries

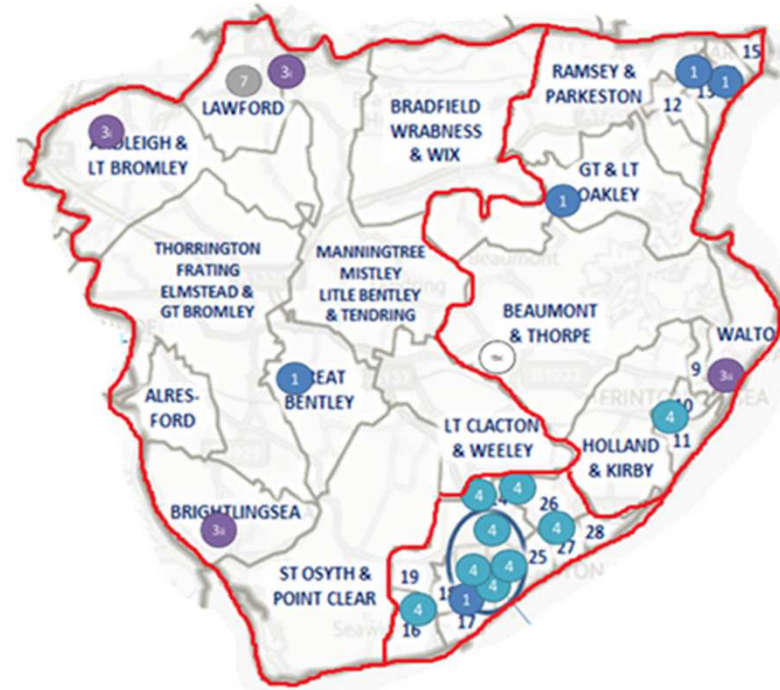

## Colchester

### AGREED OPTION: COLCHESTER – OPTION 1

Rationale: Preference expressed by 2 PCNs; better community alignment; offers the second best option in relation to population spread

## Tendring

### AGREED OPTION: TENDRING – OPTION 2

Rationale: Overall stronger support from stakeholders; even spread of population; community alignment
