TOWN AND COUNTRY PLANNING ACT 1990

APPLICATION NO: 19/01199/OUT **DATE REGISTERED:** 9th August 2019

Proposed Development and Location of Land:

**Proposed one detached bungalow.
109 Aylesbury Drive Holland On Sea Clacton On Sea Essex**

THE TENDRING DISTRICT COUNCIL AS LOCAL PLANNING AUTHORITY **HEREBY REFUSE OUTLINE PLANNING PERMISSION** in accordance with the application form, supporting documents and plans submitted, for the following reason(s)

- 1 Paragraph 100 of the National Planning Policy Framework states inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk. Local Plans should apply a sequential, risk-based approach to the location of development to avoid where possible flood risk to people and property and manage any residual risk, taking account of the impacts of climate change, by (inter alia) applying the Sequential Test.

Paragraph 101 of the NPPF further states that the aim of the Sequential Test is to steer new development to areas with the lowest probability of flooding. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower probability of flooding, and a sequential approach should be used in areas known to be at risk from any form of flooding.

These sentiments are echoed in draft policy PPL1 of the emerging Tendring District Local Plan 2013-2033 and Beyond Publication Draft, which states that all development proposals will be considered against the National Planning Policy Framework's flood risk 'sequential test' to direct development toward sites at the lowest risk of flooding unless they involve development on land specifically allocated for development.

Saved Policy QL3 of the Adopted Tendring District Local Plan 2007 also supports this approach by stating that the Council will ensure that flood risk is taken into account at all stages in the planning process to avoid inappropriate development in areas at risk of flooding, whilst for all proposed sites within Flood Zones 2 and 3, the sequential test must be applied to demonstrate that there are no reasonably available sites in a lower flood risk area.

The site lies within tidal Flood Zone 3a, which is defined as having a high probability of flooding, is classified as a more vulnerable development and the sequential test therefore must be passed.

Having assessed the information submitted, officers have identified other sites in the

surrounding area which could contain the development in a lower flood risk zone. The Council therefore does not agree that the sequential test requirement has been satisfied. The allocations in the emerging Local Plan, intelligence gathered in updating the SHLAA and knowledge of extant planning permissions indicates that there are reasonably available sites appropriate for the proposed development in areas with a lower probability of flooding that are therefore considered sequentially preferable to the application site.

It is therefore considered that the proposal has failed the Sequential Test and the benefits of the development do not therefore outweigh the risks of flooding. The proposed residential development is therefore considered to be unacceptable and contrary to the advice contained in the NPPF, policy PPL1 of the emerging Local Plan, and Saved policy QL3 of the 2007 Adopted Local Plan."
