Reason - To comply with the requirements of Section 91 of the Town and Country Planning Act 1990, as amended by the Planning and Compulsory Purchase Act 2004.

- 2 The development hereby permitted shall be carried out in accordance with the following approved plans; drawing numbers 676/1, 676/2, 676/3.

Reason - For the avoidance of doubt and in the interests of proper planning.

- 3 Prior to occupation of the development a vehicular turning facility, of a design to be approved in writing by the Local Planning Authority shall be constructed, surfaced and maintained free from obstruction within the site at all times for that sole purpose.

Reason - To ensure that vehicles can enter and leave the highway in a forward gear in the interest of highway safety.

- 4 Prior to the occupation of any of the proposed dwellings, the proposed private drive shall be constructed to a width of 5.5 metres for at least the first 6 metres from the back of the Highway Boundary.

Reason - To ensure that vehicles can enter and leave the highway in a controlled manner and to ensure that opposing vehicles can pass clear of the limits of the highway.

- 5 No unbound materials shall be used in the surface treatment of the proposed vehicular access within 6m of the highway boundary.

Reason - To ensure that loose materials are not brought out onto the highway, in the interests of highway safety.

- 6 Any gates erected at the vehicular access shall be inward opening only and shall be recessed a minimum of 6m. from the highway boundary.

Reason - To ensure that vehicles using the access may stand clear of the carriageway whilst those gates are being opened/closed, in the interests of highway safety.

- 7 No above ground works shall commence until precise details of the manufacturer and types and colours of the external facing and roofing materials to be used in construction have been submitted to and agreed, in writing, by the Local Planning Authority. Such materials as may be agreed shall be those used in the development.

Reason - The site lies adjacent to the Ardleigh Conservation Area and therefore good quality materials are essential.

- 8 No development hereby permitted shall commence until the specific requirements of paragraphs numbered 1 to 3 below have been satisfied.

1) A site investigation, based on the Phase 1 Desk Study and Risk Assessment, to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

2) A remediation method statement (RMS) based on the site investigation results and the detailed risk assessment (1). This should give full details of the remediation measures required and how they are to be undertaken. The RMS should also include a verification plan to detail the data that will be collected in order to demonstrate that the works set out in the RMS are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

3) A Closure Report is submitted upon completion of the works. The closure report shall include full verification details as set out in 2. This should include details of any post remediation sampling and analysis, together with documentation certifying quantities and source/destination of any material brought onto or taken from the site. Any material brought onto the site shall be certified clean.

Reason - To ensure that any risks (to future users of the land and neighbouring land and to controlled waters, property and ecological systems) arising from any land contamination are minimised and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

- 9 Prior to the commencement of any above ground works, a scheme of hard and soft landscaping works for the site shall be submitted to and approved, in writing, by the Local Planning Authority. The scheme shall include any proposed changes in ground levels and also accurately identify spread, girth and species of all existing trees, shrubs and hedgerows on the site and indicate any to be retained, together with measures for their protection which shall comply with the recommendations set out in the British Standards Institute publication "BS 5837: 2012 Trees in relation to design, demolition and construction.

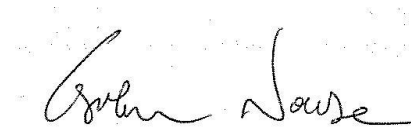

Reason - To enhance the visual impact of the proposed works.

- 10 All changes in ground levels, hard landscaping, planting, seeding or turfing shown on the approved landscaping details shall be carried out during the first planting and seeding season (October - March inclusive) following the commencement of the development or in such other phased arrangement as may be agreed in writing by the Local Planning Authority. Any trees or shrubs which, within a period of 5 years of being planted die, are removed or seriously damaged or seriously diseased shall be replaced in the next planting season with others of similar size and species, unless the Local Planning Authority agrees in writing to a variation of the previously approved details.

Reason -To enhance the visual impact of the proposed works.
