Application: 20/01537/OUT **Town / Parish:** Weeley Parish Council

Applicant: Mr Robert Godsell

Address: Reedlands Gutteridge Hall Lane Weeley

Development: Demolition of existing barn and erection of one dwelling.

1. Town / Parish Council

Weeley Parish Council Has no objection to this application
21.12.2020

2. Consultation Responses

ECC Highways Dept
14.12.2020

The information that was submitted in association with the application has been fully considered by the Highway Authority. No site visit was undertaken in conjunction with this planning application. The information submitted with the application has been thoroughly assessed and conclusions have been drawn from a desktop study with the observations below based on submitted material and Google image dated April 2010. The proposal site is accessed from and along a local road which is a no through road. The site is approximately 465 metres distance from the main road, Clacton Road. It noted that an existing access will be retained for the proposed dwelling and there appears to be sufficient parking and turning being provided.

From a highway and transportation perspective the impact of the proposal is acceptable to Highway Authority subject to the following mitigation and conditions:

1. Prior to occupation of the dwelling a 1.5 metre x 1.5 metre pedestrian visibility splay, as measured from and along the highway boundary, shall be provided on both sides of the vehicular access. Such visibility splays shall be retained free of any obstruction in perpetuity. These visibility splays must not form part of the vehicular surface of the access.

Reason: To provide adequate inter-visibility between the users of the access and pedestrians in the adjoining public highway in the interest of highway safety in accordance with policy DM1.

2. Prior to occupation of the dwelling a vehicular turning facility, of a design to be approved in writing by the Local Planning Authority shall be constructed, surfaced and maintained free from obstruction within the site at all times for that sole purpose.

Reason: To ensure that vehicles can enter and leave the highway in a forward gear in the interest of highway safety in accordance with policy DM1.

3. Any gates provided at the vehicular access shall be inward opening only and shall be set back a maximum of 0.5 metres from the back edge of the footway/cycleway or where no provision is present, the carriageway.

Reason: In the interest of highway safety in accordance with policy DM1.

4. Any new boundary planting shall be planted a minimum of 1 metre back from the highway boundary and any visibility splay.

Reason: To ensure that the future outward growth of the planting does not encroach upon the highway or interfere with the passage of users of the highway, to preserve the integrity of the highway and in the interests of highway safety and in accordance with Policy DM1.

5. The proposed dwelling shall not be occupied until such time as a domestic car parking and turning for a minimum of two vehicles has been provided in accordance with the Parking Standards, details to be agreed with the Local Planning Authority. The agreed car parking shall be retained at all times for such purpose.

Reason: To ensure that on street parking of vehicles in the adjoining streets/roads does not occur and that appropriate parking is provided in accordance with Policy DM8.

6. Cycle parking shall be provided in accordance with the EPOA Parking Standards. The approved facility shall be secure, convenient, covered and provided prior to occupation and retained at all times.

Reason: To ensure appropriate cycle parking is provided in the interest of highway safety and amenity in accordance with Policy DM8.

7. Areas within the curtilage of the site for the purpose of the reception and storage of building materials shall be identified clear of the highway.

Reason: To ensure that appropriate loading / unloading facilities are available to ensure that the highway is not obstructed during the construction period in the interest of highway safety in accordance with policy DM1.

The above conditions are to ensure that the proposal conforms to the relevant policies contained within the County Highway Authority's Development Management Policies, adopted as County Council Supplementary Guidance in February 2011.

Informative:

1: On the completion of the Development, all roads, footways/paths, cycle ways, covers, gratings, fences, barriers, grass verges, trees, and any other street furniture within the Site and in the area it covers and any neighbouring areas affected by it, must be left in a fully functional repaired/renovated state to a standard accepted by the appropriate statutory authority.

2: All work within or affecting the highway is to be laid out and constructed by prior arrangement with and to the requirements and specifications of the Highway Authority; all details shall be agreed before the commencement of works.

The applicants should be advised to contact the Development Management Team by email at development.management@essexhighways.org or by post to:

SMO1 - Development Management Team
Ardleigh Depot,
Harwich Road,
Ardleigh,
Colchester,
CO7 7LT

3: The applicant must ensure that no mud or detritus is taken onto the highway, such measures include provision of wheel cleaning facilities and sweeping/cleaning of the highway Under Section 148 of the Highways Act 1980 it is an offence to deposit mud, detritus etc. on the highway. In addition, under Section 161 any person, depositing anything on a highway which results in a user of the highway being injured or endangered is guilty of an offence.

4: The (rural/remote) location of the site is such that access to key facilities, public transport, employment and leisure opportunities is limited and for the vast majority of journeys the only practical option would be the car. This should be taken into consideration by the Planning Authority when assessing the overall sustainability and acceptability of the site.

Status of the Local Plan

The 'development plan' for Tendring is the 2007 'adopted' Local Plan. Paragraph 213 of the NPPF (2019) allows local planning authorities to give due weight to adopted albeit outdated policies according to their degree of consistency with the policies in the NPPF. Paragraph 48 of the NPPF also allows weight to be given to policies in emerging plans according to their stage of preparation, the extent to which there are unresolved objections to relevant policies and the degree of consistency with national policy. In this latter regard, as of 26th January 2021, 'Section 1' of the emerging Local Plan for Tendring (Tendring District Local Plan 2013-2033 and Beyond Publication Draft) has been adopted and forms part of the 'development plan' for Tendring.

Section 1 of the Local Plan (which sets out the strategy for growth across North Essex including Tendring, Colchester and Braintree) has been examined by an Independent Planning Inspector who issued his final report and recommended 'main modifications' on 10th December 2020. The Inspector's report confirms that, subject to making his recommended main modifications (including the removal from the plan of two of the three 'Garden Communities' proposed along the A120 i.e. those to the West of Braintree and on the Colchester/Braintree Border), the plan is legally compliant and sound and can proceed to adoption. Notably, the housing and employment targets in the plan have been confirmed as sound, including the housing requirement of 550 dwellings per annum in Tendring.

The Council has now formally adopt Section 1 of the Local Plan, in its modified state, at the meeting of Full Council on 26th January 2021, at which point it became part of the development plan and carries full weight in the determination of planning applications – superseding, in part, some of the more strategic policies in the 2007 adopted plan.

The examination of Section 2 of the Local Plan (which contains more specific policies and proposals for Tendring) will proceed in early 2021 and two Inspectors have been appointed by the Secretary of State to undertake the examination, with the Council preparing and updating its documents ready for the examination. In time, the Section 2 Local Plan (once examined and adopted in its own right) will join the Section 1 Plan as part of the development plan, superseding in full the 2007 adopted plan.

Where emerging policies are particularly relevant to a planning application and can be given weight in line with the principles set out in paragraph 48 of the NPPF, they will be considered and, where appropriate, referred to in decision notices.

In relation to housing supply:

The NPPF requires Councils to boost significantly the supply of housing to meet objectively assessed future housing needs in full. In any one year, Councils must be able to identify five years' worth of deliverable housing land against their projected housing requirements (plus an appropriate buffer to ensure choice and competition in the market for land, account for any fluctuations in the market or to improve the prospect of achieving the planned supply). If this is not possible, or housing delivery over the previous three years has been substantially below (less than 75%) the housing requirement, paragraph 11 d) of the NPPF requires applications for housing development needing to be assessed on their merits, whether sites are allocated for development in the Local Plan or not.

With the adoption of the modified Section 1 of the emerging Local Plan, the Councils 'objectively assessed housing need' of 550 dwellings per annum has been found 'sound' and there is no housing shortfall. The Council is able to report a significant surplus of housing land supply over the 5 year requirement, in the order of 6.5 years.

5. Officer Appraisal (including Site Description and Proposal)

Site Description

The application relates to 'Reedlands', Gutteridge Hall Lane, Weeley. The application site is located outside of the settlement boundary in both the Saved and Emerging Local Plan. The application site is located within the garden of 'Reedlands'.

Proposal

This application seeks outline planning permission for the demolition of existing barn and erection of one dwelling.

This application is establishing the principle only. Access, Layout, Scale, Landscaping and Appearance is therefore reserved for subsequent approval as part of a detailed application.

Assessment

The main considerations for this application are;

- Principle of Development including self-build
- Layout, Scale, Character and Impact
- Residential Amenities
- Highway Safety and Parking
- Trees and Landscaping

- Financial Contributions
- Habitat Regulations Assessment
- Other Considerations

1. Principle of Development (5 Year Housing Land Supply)

Paragraph 7 of the National Planning Policy Framework 2019 (NPPF) states that the purpose of the planning system is to contribute to the achievement of sustainable development. Paragraph 8 explains that achieving sustainable development means that the planning system has three overarching objectives, namely an economic objective, a social objective and an environmental objective. However, Paragraph 9 emphasises that these objectives should be delivered through the preparation and implementation of plans and the application of the policies in the NPPF; they are not criteria against which every decision can or should be judged. This is supported through Paragraph 11 which states that plans and decisions should apply a presumption in favour of sustainable development and for plan-making this means that plans should positively seek opportunities to meet the development needs of their area. Strategic policies should, as a minimum, provide for objectively assessed needs for housing.

For decision-taking this means approving development proposals that accord with an up-to-date development plan without delay. Where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date then permission should be granted. Footnote 7 explains that this includes, for applications involving the provision of housing, situations where the local planning authority cannot demonstrate a five year supply of deliverable housing sites with the appropriate buffer, as set out in paragraph 73.

However, Paragraph 12 of the NPPF states that presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision making. Where a planning application conflicts with an up-to-date development plan permission should not usually be granted. Local planning authorities may take decisions that depart from an up-to-date development plan, but only if material considerations in a particular case indicate that the plan should not be followed. Paragraph 47 confirms that planning law requires that applications for planning permission be determined in accordance with the development plan, unless material considerations indicate otherwise.

The 'development plan' for Tendring is the 2007 'adopted' Local Plan. Paragraph 213 of the NPPF (2019) allows local planning authorities to give due weight to adopted albeit outdated policies according to their degree of consistency with the policies in the NPPF. Paragraph 48 of the NPPF also allows weight to be given to policies in emerging plans according to their stage of preparation, the extent to which there are unresolved objections to relevant policies and the degree of consistency with national policy. As of 16th June 2017, the emerging Local Plan for Tendring is the Tendring District Local Plan 2013-2033 and Beyond Publication Draft.

Section 1 of the Local Plan (which sets out the strategy for growth across North Essex including Tendring, Colchester and Braintree) has been examined by an Independent Planning Inspector who issued his final report and recommended 'main modifications' on 10th December 2020. The Inspector's report confirms that, subject to making his recommended main modifications (including the removal from the plan of two of the three 'Garden Communities' proposed along the A120 i.e. those to the West of Braintree and on the Colchester/Braintree Border), the plan is legally compliant and sound and can proceed to adoption. Notably, the housing and employment targets in the plan have been confirmed as sound, including the housing requirement of 550 dwellings per annum in Tendring.

The Council has now formally adopted Section 1 part of the development plan which carries full weight in the determination of planning applications - superseding, in part, some of the more strategic policies in the 2007 adopted plan. In the interim, the modified policies in the Section 1 Local Plan, including the confirmed housing requirement, can be given significant weight in decision making owing to their advancement through the final stages of the plan-making process.

The examination of Section 2 of the Local Plan (which contains more specific policies and proposals for Tendring) is now expected to proceed in 2021 and two Inspectors have already been

appointed by the Secretary of State to undertake the examination, with the Council preparing and updating its documents ready for the examination. In time, the Section 2 Local Plan (once examined and adopted in its own right) will join the Section 1 Plan as part of the development plan, superseding in full the 2007 adopted plan.

Where emerging policies are particularly relevant to a planning application and can be given weight in line with the principles set out in paragraph 48 of the NPPF, they will be considered and, where appropriate, referred to in decision notices.

The NPPF requires Councils to boost significantly the supply of housing to meet objectively assessed future housing needs in full. In any one year, Councils must be able to identify five years' worth of deliverable housing land against their projected housing requirements (plus an appropriate buffer to ensure choice and competition in the market for land, account for any fluctuations in the market or to improve the prospect of achieving the planned supply). If this is not possible, or housing delivery over the previous three years has been substantially below (less than 75%) the housing requirement, paragraph 11 d) of the NPPF requires applications for housing development needing to be assessed on their merits, whether sites are allocated for development in the Local Plan or not.

As the supply of deliverable housing sites in the modified Section 1 of the Local Plan is now in the order of 6.5 years this actual objectively assessed housing need for Tendring is a significant material consideration in the determination of planning applications which substantially tempers the amount of weight that can reasonably be attributed to the benefit of additional new housing - particularly in the consideration of proposals that fall outside of the settlement development boundaries in either the adopted or the emerging Section 2 Local Plan.

In this instance, the site lies outside of the settlement development boundary for Weeley as defined within both the adopted Tendring District Local Plan 2007 and the emerging Tendring District Local Plan 2013-2033 and Beyond Publication Draft 2017. Saved Tendring District Local Plan (2007) Policy QL1 sets out that development should be focused towards the larger urban areas and to within development boundaries as defined within the Local Plan. These sentiments are carried forward in emerging Policy SPL1 of the Publication Draft.

Saved Policy QL1 of the adopted Local Plan remains broadly consistent with the NPPF objective for achieving sustainable development. This is through a plan-led approach that focuses development to locations which are or can be made sustainable, limiting the need to travel and offering a genuine choice of transport modes. This also includes making effective use of land, particularly that which is previously developed, in meeting the need for homes. Those planned for rural areas are responsive to local circumstances and support local needs, whilst recognising the intrinsic character and beauty of the countryside. Emerging Policy SPL1 of the Publication Draft gain traction due to the same consistency with the NPPF as found in respect of those in the adopted Local Plan.

As set out above, the policies for the delivery of housing are considered up-to-date and the application must therefore be determined in accordance with Paragraph 11 c) of the NPPF, thus in accordance with the development plan.

Accounting for the housing land supply situation then, regardless of the proximity of the site in relation to services and amenities, there is no longer a requirement to consider such sites due to their location outside of the defined settlement development boundaries as the planned growth for the District to meet housing need has been established. In applying the NPPF's presumption in favour of sustainable development, the adverse impacts of the proposal both on the character of the locality and on the Council's ability to manage growth through the plan-led approach, are not outweighed by any benefits. The development is an unnecessary intrusion into the countryside and there are no public benefits that might warrant the proposal being considered in an exceptional light. The proposal is therefore contrary to the aims of paragraph 11 of the NPPF and contrary to the development plan Saved Policy QL1 and emerging Policy SP1.

2. Layout, Scale, Character and Impact

Paragraphs 127 and 170 of the NPPF state that developments should add to the overall quality of the area, be visually attractive as a result of good architecture and be sympathetic to local character, including the surrounding built environment.

Saved Policies QL9, QL10 and QL11 of the adopted Tendring District Local Plan (2007) seek to ensure that all new development makes a positive contribution to the quality of the local environment and character, by ensuring that proposals are well designed, relate satisfactorily to their setting and are of a suitable scale, mass and form. These sentiments are carried forward within Policy SPL3 of the emerging Local Plan.

The application is in outline form only, with all matters reserved for a future application. As such, no elevational or floor plans have been provided. A proposed block plan has been provided demonstrating the proposed dwelling and the access off of Gutteridge Hall Lane. It is considered that the site is capable of accommodating a dwelling with all of the necessary parking and private amenity requirements. The design of the dwelling should be in keeping with the current street scene.

Policy HG9 of the Saved Tendring Local Plan 2007 states that private amenity space for a dwelling of one bedroom should be a minimum of 50 square metres, for a dwelling with two bedrooms there should be a minimum of 75 square metres, and for a dwelling of three bedrooms or more there should be a minimum of 100 square metres. The submitted plans provide no information as to the number of bedrooms, but the above minimum measurements must be adhered to within a future application.

3. Residential Amenities

The NPPF, in paragraph 127 states that planning should always seek to secure a good standard of amenity for all existing and future occupants of land and buildings. In addition, Policy QL11 of the Tendring District Local Plan (2007) states that amongst other criteria, 'development will only be permitted if the development will not have a materially damaging impact on the privacy, daylight or other amenities of occupiers of nearby properties'. These sentiments are carried forward in Policy SPL3 of the Tendring District Local Plan 2013-2033 and Beyond Publication Draft (2017).

Paragraph 108 of the NPPF seeks to ensure that safe and suitable access to a development site can be achieved for all users. Saved Policy QL10 of the adopted Tendring District Local Plan 2007 states that planning permission will only be granted, if amongst other things, access to the site is practicable and the highway network will be able to safely accommodate the additional traffic the proposal will generate. These objectives are supported by emerging Policy SPL3 of the Tendring District Local Plan 2013-2033 and Beyond Publication Draft 2017.

Appearance and layout are reserved for later consideration. It is considered that the proposed dwelling could be accommodated on the site with no material loss of amenity in terms of loss of light, outlook or privacy. It is therefore considered that sufficient spacing between properties could be achieved to result in a development that would not harm the amenities of neighbours.

4. Highway Safety and Parking

Paragraph 108 of the NPPF seeks to ensure that safe and suitable access to a development site can be achieved for all users. Saved Policy QL10 of the adopted Tendring District Local Plan 2007 states that planning permission will only be granted, if amongst other things, access to the site is practicable and the highway network will be able to safely accommodate the additional traffic the proposal will generate. These objectives are supported by emerging Policy SPL3 of the Tendring District Local Plan 2013-2033 and Beyond Publication Draft 2017.

Essex Highways Authority have been consulted on this application and have stated that the information that was submitted in association with the application has been fully considered by the Highway Authority. No site visit was undertaken in conjunction with this planning application. The information submitted with the application has been thoroughly assessed and conclusions have

been drawn from a desktop study with the observations below based on submitted material and Google image dated April 2010. The proposal site is accessed from and along a local road which is a no through road. The site is approximately 465 metres distance from the main road, Clacton Road. It noted that an existing access will be retained for the proposed dwelling and there appears to be sufficient parking and turning being provided. The Highway Authority therefore have no objections subject to conditions relating to pedestrian visibility splays, vehicular turning facility, gates, new boundary planting, car parking and turning, cycle parking and storage of building materials. The storage of building materials will be imposed as an informative only.

As access is a reserved matter these conditions will not be imposed at this stage but will be reconsidered on submission of the detailed reserved matters proposal.

Furthermore, the Council's Adopted Parking Standards require that for a dwelling with two or more bedrooms that a minimum of two parking spaces are required. Parking spaces should measure 5.5m x 2.9 metres and garages, if being relied on to provide a parking space, should measure 7m x 3m internally. The submitted plans do not indicate the number of bedrooms, but it is considered there is sufficient space within the site to provide the necessary parking for a dwelling.

5. Trees and Landscaping

Paragraph 170 of the National Planning Policy Framework (2019) states planning decisions should contribute to and enhance the natural and local environment by recognising the intrinsic character and beauty of the countryside, and should protect and enhance valued landscapes.

Policy EN1 of the Saved Local Plan states the quality of the district's landscape and its distinctive local character will be protected and, where possible, enhanced. Any development which would significantly harm landscape character or quality will not be permitted. The sentiments of this policy are carried forward within Emerging Local Plan Policy PPL3.

The application site currently appears to be associated with the residential curtilage of the host property. There are 6 mature Oaks on the boundary of the application site immediately adjacent to Gutteridge Hall Lane. These trees are afforded formal legal protection by Tendring District Council Tree Preservation Order: Ref TPO/10/00053

A tree survey has been provided with this application and it is considered that the survey and report is comprehensive and is in accordance with BS5837; 2012 Trees in relation to design, demolition and construction - Recommendations.. The information contained in the report adequately demonstrates that the development proposal can be implemented without significant harm being caused to the health or condition of the trees and that the development will not compromise the amenity value of the retained Oaks.

Any future planning application should be supported by a soft landscaping scheme. The scheme should aim to enhance the appearance and strengthen the screening of the proposed development.

7. Financial Contribution - Open Space and Play Space

Policy COM6 of the adopted Local Plan states "For residential development below 1.5 hectares in size, developers shall contribute financially to meet the open space requirements of the development in proportion to the number and size of dwellings built". The financial contribution would be secured through a legal agreement.

There is currently a deficit of -2.18 hectares of equipped play and formal open space in Weeley. Although there is currently a deficit of play space in Weeley, due to the size of this development it is not thought that there will be an impact on the current deficit. Therefore no contribution is being requested on this occasion. Should there be further development then a contribution may be required.

8. Financial Contribution - Recreational Disturbance

Following Natural England's recent advice and the introduction of Zones of Influences around all European Designated Sites (i.e. Ramsar, Special Protection Areas and Special Area of Conservation). Within Zones of Influences (which the site falls within) Natural England are requesting financial contributions to mitigate against any recreational impact from new dwellings.

Under the Habitats Regulations, a development which is likely to have a significant effect or an adverse effect (alone or in combination) on a European designated site must provide mitigation or otherwise must satisfy the tests of demonstrating 'no alternatives' and 'reasons of overriding public interest'. There is no precedent for a residential development meeting those tests, which means that all residential development must provide mitigation.

The application scheme proposes a new dwelling on a site that lies within the Zone of Influence (Zol) being approximately 4.4km away from Colne Estuary RAMSAR and SPA and Essex Estuaries SAC.

New housing development within the Zol would be likely to increase the number of recreational visitors to Colne Estuary and Essex Estuaries and in combination with other developments it is likely that the proposal would have significant effects on the designated site. Mitigation measures must therefore be secured prior to occupation.

A completed unilateral undertaking has been received to secure the financial contribution required to mitigate against any recreational impact from the new dwelling and to ensure that the development would not adversely affect the integrity of European Designated Sites in accordance with policies EN6 and EN11a of the Saved Tendring District Local Plan 2007, Policy PPL4 of the emerging Tendring District Local Plan 2013-2033 and Beyond Publication Draft and Regulation 63 of the Conservation of Habitat and Species Regulations 2017.

9. Other considerations

Weeley Parish Council have not commented on this application.

No letters of representation have been received.

6. **Recommendation**

Refusal - Outline

7. **Reasons for Refusal**

- 1 Paragraph 11 of the National Planning Policy Framework 2019 (NPPF) states that plans and decisions should apply a presumption in favour of sustainable development. For plan-making this means that plans should positively seek opportunities to meet the development needs of their area. Strategic policies should, as a minimum, provide for objectively assessed needs for housing. For decision-taking this means approving development proposals that accord with an up-to-date development plan without delay. Paragraph 12 of the NPPF states that presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision making. Where a planning application conflicts with an up-to-date development plan permission should not usually be granted.

Section 1 of the Local Plan (which sets out the strategy for growth across North Essex including Tendring, Colchester and Braintree) has been examined by an Independent Planning Inspector who issued his final report and recommended 'main modifications' on 10th December 2020. The Inspector's report confirms that, the housing and employment targets in the plan have been confirmed as sound, including the housing requirement of 550 dwellings per annum in Tendring. The Council has now formally adopted Section 1 part of the development plan which carries full weight in the determination of planning applications

- superseding, in part, some of the more strategic policies in the 2007 adopted plan. In the interim, the modified policies in the Section 1 Local Plan, including the confirmed housing requirement, can be given significant weight in decision making owing to their advancement through the final stages of the plan-making process.

For the purposes of the determination of this application the Council can currently demonstrate that a 5 year housing land supply exists. Engaging the presumption in favour of sustainable development under paragraph 11d) of the NPPF does not apply in this instance. The policies for the delivery of housing are considered up-to-date and the application must therefore be determined in accordance with Paragraph 11 c) of the NPPF, thus in accordance with the development plan.

The application site lies outside of any Settlement Development Boundary as defined within both the adopted Tendring District Local Plan (2007) and the emerging Tendring District Local Plan 2013-2033 and Beyond Publication Draft (2017). Regardless of the proximity of the site in relation to services and amenities, there is no longer a requirement to consider such sites due to their location outside of the defined settlement development boundaries as the planned growth for the District to meet housing need has been established. The adverse impacts of the proposal both on the character of the locality and on the Council's ability to manage growth through the plan-led approach, are not outweighed by any benefits or other material considerations. The development is unnecessary and there are no public benefits that might warrant the proposal being considered in an exceptional light. The proposal is therefore contrary to the aims of paragraph 11c) of the NPPF and contrary to the development plan Saved Policy QL1 and emerging Policy SP1.

8. Informatives

Positive and Proactive Statement

The Local Planning Authority has acted positively and proactively in determining this application by identifying matters of concern with the proposal and discussing those with the Applicant. However, the issues are so fundamental to the proposal that it has not been possible to negotiate a satisfactory way forward and due to the harm which has been clearly identified within the reason(s) for the refusal, approval has not been possible.

Environmental Protection

Contaminated Land - Prior to the commencement of any permitted development, the applicant is advised to undertake a suitable and sufficient site investigation and any necessary risk assessment to ensure the land is free from significant levels of contamination. A Risk Assessment shall be provided to enable Tendring District Council to decide whether the site can be made suitable for its proposed use prior to any permission being granted. This will incorporate a 'phase one' assessment in the form of a desktop study/site walkover report. This will include a review of previous investigations; previous uses; potential sources of contamination; and potential pathways and receptors. If necessary, this shall be followed up by a 'phase two' risk assessment that shall incorporate a detailed intrusive investigation referring to the phase one study.

The purpose of these requests is to protect the health and amenity of nearby residential dwellings, site workers and end users.

The Environmental team would also like to highlight, that at any further application phase, we would request information on the applicants proposal for demolition and construction.

Are there any letters to be sent to applicant / agent with the decision? If so please specify:	YES	NO
Are there any third parties to be informed of the decision? If so, please specify:	YES	NO
