Our Ref: 21/01318/COUNOT

17 September 2021

Dear Sir/Madam

TOWN AND COUNTRY PLANNING (GENERAL PERMITTED DEVELOPMENT) (ENGLAND) ORDER 2016

APPLICATION NO: 21/01318/COUNOT
PROPOSAL: Change of use from existing agricultural building to a dwellinghouse.
LOCATION: Long Barn Blackwater Farmhouse Lee Wick Lane St Osyth

Thank you for your notification on the above matter which was received on 23 July 2021 and made valid on 23 July 2021 and was allocated the reference **21/01318/COUNOT**.

I can now advise you that this proposal will **not** require prior approval of the Local Planning Authority.

The proposal constitutes permitted development as defined in Schedule 2, Part 3, Class Q of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) and may therefore be carried out providing that it is wholly in accordance with the legislation.

Conditions

- 1 The development must not begin before the occurrence of the receipt by the applicant from the local planning authority of a written notice of their determination that such prior approval is not required.

Reason - In order to comply Schedule 2, Part 3, Class Q of The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended).

- 2 Development under Class Q is permitted subject to the condition that development under Class Q(a), and under Class Q(b), if any, must be completed within a period of 3 years starting with the prior approval date.

Reason - In order to comply Schedule 2, Part 3, Class Q of The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended).

- 3 The development must be carried out (b) where prior approval is not required, or where sub-paragraph (11)(c) applies, in accordance with the details provided in the application referred to in sub-paragraph (1), unless the local planning authority and the developer agree otherwise in writing.

Reason - In order to comply Schedule 2, Part 3, Class Q of The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended).

- 4 If during construction/demolition works evidence of potential contamination is encountered, works shall cease and the site fully assessed to enable an appropriate remediation plan to be developed.
Works shall not re-commence until an appropriate remediation scheme has been submitted to, and approved in writing by, the Local Planning Authority and the remediation has been completed.
Upon completion of the building works, this condition shall not be discharged until a closure report has been submitted to and approved in writing by the Local Planning Authority. The closure report shall include details of;
- a) Details of any sampling and remediation works conducted and quality assurance certificates to show that the works have been carried out in full in accordance with the approved methodology.
 - b) Details of any post-remedial sampling and analysis to show the site has reached the required clean-up criteria shall be included in the closure report together with the necessary documentation detailing what waste materials have been removed from the site.
 - c) If no contamination has been discovered during the build then evidence (e.g. photos or letters from site manager) to show that no contamination was discovered should be included.

Reason - To ensure that any risks from land contamination to the future users of the land and neighbouring land are minimised.

If you require any clarification on this matter or further information, please contact the case officer Naomi Hart on 686137.

Yours faithfully

Graham Nourse
Assistant Director
Planning Service
