Any species planted becoming diseased or dying within 3 years of planting shall be replaced to the satisfaction of the Local Planning Authority.

Reason - In the interests of visual amenity, biodiversity enhancement and landscape protection.

- 4 The approved landscaping scheme shall be carried out during the first planting and seeding season (October - March inclusive) following the commencement of the development or in such other phased arrangement as may be agreed in writing by the local planning authority. Any trees or shrubs which, within a period of 5 years of being planted die, are removed or seriously damaged or seriously diseased shall be replaced in the next planting season with others of similar size and species, unless the Local Planning Authority agrees in writing to a variation of the previously approved details.

Reason - In order to soften and mitigate the visual impact of the development on the remaining open fields beyond having regard to the semi-rural setting of the site.

- 5 No development shall take place until the Oak tree on the site has been protected by the erection of temporary protective fences of a height, size and in positions which shall previously have been agreed, in writing, with the Local Planning Authority. The protective fences shall be retained throughout the duration of building and engineering works in the vicinity of the trees to be protected. Any trees dying or becoming severely damaged as a result of any failure to comply with these requirements shall be replaced with trees of appropriate size and species during the first planting season, or in accordance with such other arrangement as may be agreed in writing with the Local Planning Authority, following the death of, or severe damage to the trees.

Reason - To ensure that no development impacts upon the protected trees.

- 6 Prior to occupation of the development, the road junction/access at its centre line shall be provided with a clear to ground visibility splay with dimensions of 2.4 metres by 139 metres to the north and 2.4 metres by 171m metres to the south, as measured from and along the nearside edge of the carriageway. Such vehicular visibility splays shall be provided before the road junction / access is first used by vehicular traffic and retained free of any obstruction at all times.

Reason - To provide adequate inter-visibility between vehicles using the road junction / access and those in the existing public highway in the interest of highway safety.

- 7 As indicated on Drawing Number DTR-01 Revision A and prior to occupation of the development, a minimum size 3 vehicular turning facility, of a design to be approved in writing by the Local Planning Authority, shall be constructed, surfaced, and maintained free from obstruction within the site at all times for that sole purpose.

- 8 Prior to the occupation of any of the proposed dwellings, the proposed private drive shall be constructed to a width of 5.5 metres for at least the first 6 metres from the back of the Highway Boundary and shall be provided with an appropriate vehicular crossing.

Reason - To ensure that vehicles can enter and leave the highway in a controlled manner and to ensure that opposing vehicles can pass clear of the limits of the highway, in the interests of highway safety.

- 9 There shall be no discharge of surface water onto the Highway.

Reason - To prevent hazards caused by water flowing onto the highway and to avoid the formation of ice on the highway in the interest of highway safety.

- 10 At no point shall gates be retained at the vehicular access. The access shall remain open and free for use thereafter.

Reason - To give vehicles using the access free and unhindered access to and from the highway in the interest of highway safety.

- 11 Any new boundary planting shall be planted a minimum of 1 metre back from the highway boundary and any visibility splay.

Reason - To ensure that the future outward growth of the planting does not encroach upon the highway or interfere with the passage of users of the highway, to preserve the integrity of the highway and in the interests of highway safety.

- 12 Prior to the occupation of the development the internal layout/footway provision shall be provided in principle with drawing number:

o Drawing: DTR-01 Revision A

Standard Informative 3: If the development includes the construction of a new building on or at the boundary of 2 properties, work to an existing party wall or party structure or involve excavation near to and below the foundation level of neighbouring buildings, you are advised that the provisions of the Party Wall Act 1996 may apply to this development.
