

Corporate Risk Register June 2017

Tendring
District Council

INTRODUCTION

The management of Risk is a key element to any organisation in order to protect its resources (human & physical), finances and reputation. By undertaking regular, stringent and structured analysis of the risks faced by the organisation senior managers are able to take strategic decisions to mitigate against such risks whilst still being able to take the necessary decisions for a progressive council.

This document explains the methodology used to analyse and identify the risks which are considered to be of a sufficient level to be monitored corporately. The process of identifying risks is a linear examination at service, departmental and subsequently corporate level. It is only by undertaking a thorough and detailed risk assessment that this can be achieved.

Each risk is assessed for the likelihood of the risk occurring, as well as the potential impact of such an occurrence. The combination of these two factors gives an initial risk rating. Each risk is then 'managed' by the implementation of control measures. It is then re-assessed to give a residual risk rating.

Only risks which would have a significant corporate-level impact upon the ability of the Council to undertake its normal service delivery, finances, safety, or reputation are reported at this level.

DEFINITIONS

Risk: A risk is an event or action which may adversely affect the Council. It can arise from the possibility of not realising opportunities as well as from a threat materialising. Risk management is embedded across the organisation and forms part of each directorate's everyday function. They follow the format '[x...] leading to [y...] resulting in [z]'. Please note that as we increase our partnership and multi-agency work, risks become increasingly complex as controls may become out of our direct control.

Inherent risk: This is the level of risk that is present before controls have been applied. Measured by evaluating the impact and probability of the risk to calculate an Inherent Risk Rating.

Residual risk: This is the level of risk remaining after application of controls. The Residual Risk Rating is calculated on the same basis as for inherent risk, but factoring in any changes in impact and probability arising from the controls in place to mitigate the inherent risk.

Control: Controls are a key mechanism for managing risk and are put in place to provide reasonable assurance. Examples of controls can include policies and procedures adopted, progression of ongoing actions, or implementation of recommendations resulting from internal audits.

Warning indicators: These are the mechanisms or issues that will highlight that the risk is not being mitigated by the controls identified, or to the extent expected. These can be internal or external to the organisation.

RISK RATING CATEGORIES

20

High Risks (Rating of 15-25)

- Risks at this level will be considered to be above the Council's risk tolerance level. These risks require immediate attention and, as a high priority, a plan needs to be put together to provide sufficient mitigation resulting in a lower rating for the residual risk, wherever possible.
- Management Team should regularly review any risks in the Corporate Risk Register where the mitigated level remains above the risk tolerance level.
- Where a risk in a Departmental Risk Register scores at this level, consideration will be given to any corporate impact, and whether there is a need for the risk to be considered in the Corporate Risk Register.

12

Medium Risks (Rating of 6-12)

- Controls should be put in place to mitigate the risk, wherever possible, especially where the risk is close to the risk tolerance level, or is increasing over time. However where the options for mitigation would not provide value for money, the risk may be tolerated.

4

Low Risks (Rating of 1-5)

- No action required to mitigate these risks.

| 1b | Catastrophic IT network failure | 5 | 3 | 15 | Cisco -based corporate network replacement works completed Nov'14 (excluding Weeley Offices due to closure plans under office transformation). Additional resilience of removing single points of failure and dynamic routing implemented. New wireless network available at all main council offices (including Leisure Centres). The wireless network itself offers additional resilience subject to where a network fault/damage occurs. NOTE: Reference Weeley, the majority of staff now have new laptops so could work from alternate locations(s) should a significant issue occur. Resilience built into other IT Investment Strategies including 'mirrored' data storage at Town Hall and Barnes House and enhanced data backup. Management Team are scheduled to consider a proposal in JULY to move to a more risk-managed approach to our Disaster Recovery (DR) arrangements to reduce ongoing IT operating costs – data back up to Microsoft Azure 'cloud' platform as an alternative to replacement 'servers on a lorry' contract. | Network monitoring alarms | John Higgins | July-17 | 5 | 1 | 5 | ↓ | 2 & 3 |

|-----------------------------------|--|---|---|----|--|--|--|---------------------------|---|---|---|---|---|
| 2a | <p>Coastal Defence The Council has a coastline of 60km and maintains the sea defence structures along 18.5km of this frontage. These defences protect the towns of Harwich, Dovercourt, Walton on the Naze, Frinton on Sea, Holland on Sea, Clacton and Brightlingsea. Unforeseen expenditure may be required on sea defences; which if left to deteriorate could cause catastrophic cliff failure and impact safety of residents/visitors nearby. The East Coast of the UK is vulnerable to a phenomenon called a North Sea Tidal Surge.</p> | 5 | 1 | 5 | Carrying out annual inspections of coast protection structures and responding swiftly to public reporting of faults. An annual maintenance programme for the coastal frontage is set each year with an appropriate budget to cover the works. Each year sections of the sea defences are improved as part of a rolling programme of special maintenance schemes funded from the Council's Revenue Budgets. Works undertaken range from day to day maintenance of promenades and seawalls to schemes costing millions of pounds. Larger capital schemes attracting grant in aid are produced to comply with Defra guidelines and their High Level Targets for coast protection. | Under Review | Damian Williams | Annually | 1 | 1 | 1 | ↓ | 3 |
| 2c | <p>Community Leadership Projects Potential for impact to the reputation of the Council and impact on Communities, through failure to deliver key projects with partners.</p> | 4 | 3 | 12 | Clearly defined ToR agreed between partners & TDC. APPENDIX – METHODOLOGY FOR CALCULATING RISK

RISK RATING ELEMENTS - IMPACT

| Risk level | Impact | | | | |
|------------|-----------------|-------------------------------|---|---|---|
| | Level | Financial | Service Delivery | Safety | Reputation |
| 5 | Critical | Loss of more than £1m | Effective service delivery is unachievable. | Fatality (Single or Multiple) | Reputation damage is severe and widespread i.e. Regulatory body intervention |
| 4 | Major | Loss above 250K but below £1m | Effective service delivery is severely disrupted in one or more areas | Multiple serious injuries requiring professional medical treatment | Reputation damage occurs with key partners. |
| 3 | Sizeable | Loss above £25K below £250K | Effective service delivery is disrupted in specific areas of the Council. | Injury to an individual(s) requiring professional medical treatment | Reputation damage is localised and/or relatively minor for the Council as a whole |
| 2 | Moderate | Loss above £5K below £25K | Delays in effective service delivery | Minor injury - no professional medical treatment | Slight reputation damage |
| 1 | Minor | Loss of up to £5K | Minor disruption to effective service delivery i.e. Staff in unplanned absence for up to one week | No treatment required | Reputation damage only on personal level |

RISK RATING ELEMENTS - PROBABILITY

| Timescale | Up to 6 months | To 12 months | To 24 months | To 60 months | 60+ months |
|-------------|----------------|--------------|--------------|--------------|------------|
| Probability | | | | | |
| Over 80% | 5 | 4 | 3 | 2 | 1 |
| 65%-80% | 4 | 4 | 3 | 2 | 1 |
| 50 – 64% | 3 | 3 | 3 | 2 | 1 |
| 30 – 49% | 2 | 2 | 2 | 2 | 1 |
| Under 30% | 1 | 1 | 1 | 1 | 1 |
