

DELEGATED DECISION OFFICER REPORT

AUTHORISATION	INITIALS	DATE
Case officer recommendation:	ER	16/03/23
Planning Manager / Team Leader authorisation:	AN	16/03/23
Planning Technician final checks and despatch:	ER	16/03/2023

Application: 23/00130/FUL **Town / Parish:** Clacton Non Parished

Applicant: Mr James Brown - British Telecom Plc

Address: Footpath outside Morrisons Daily 52 - 54 North Road

Development: Proposed installation of proposed street hub and associated display of advertisement to both sides of unit.

1. Town / Parish Council

Clacton non parished

2. Consultation Responses

ECC Highways Dept
16.02.2023

From a highway and transportation perspective the impact of the proposal is NOT acceptable to the Highway Authority for the following reasons:

The Highway Authority will protect the principal use of the highway as a right of free and safe passage of all highway users.

As indicated on drawing; BT STREETHUB CLN-201, the location of the unit will impact on the available footway width in a busy pedestrian friendly location and the proposal would create an obstruction where members of the public are entitled to pass and repass over highway land unobstructed. The interference which this proposal would engender for pedestrians, resulting in an unacceptable degree of hazard to pedestrian users to the detriment of general highway safety. The proposal is therefore contrary to policy DM1, and DM7 contained within the Highway Authority's Development Management Policies, adopted as County Council Supplementary Guidance in February 2011.

Informative:

1: Any apparatus located within the highway should be positioned at the back of the footway.

2: A minimum footway width of 2 metres must be retained adjacent to the apparatus at all times and must not be in the vicinity of a formal pedestrian crossing facility.

3: A Highway Boundary Plan should be obtained from ECC Highway Records to establish the line of the highway boundary to the front of the shops to establish whether an alternative and more appropriate location can be found to the back of the footway. Email address Highway.Status@essexhighways.org

4: Consider as any other application for: obstruction, visibility obstruction, luminance, and distraction issues (display units: flashing/intermittent images).

Environmental Protection
07.02.2023

The Highway Authority may consider a revised application that addresses the issues highlighted above.

Thank you for your consultation regarding the proposed development above. The Environmental Protection Team's comments are given below:

Tree & Landscape Officer
09.02.2023

I have reviewed the application and can confirm that Environmental Protection have no comments to make.

No trees or other significant vegetation will be affected by the development proposal.

Tendring District Local Plan 2013-2033 and Beyond Section 2 (adopted January 2022)

SPL3 Sustainable Design

CP2 Improving the Transport Network

CP3 Improving the Telecommunications Network

Status of the Local Plan

Planning law requires that decisions on applications must be taken in accordance with the development plan unless there are material considerations that indicate otherwise (Section 70(2) of the 1990 Town and Country Planning Act and Section 38(6) of the Planning and Compulsory Purchase Act 2004). This is set out in Paragraph 2 of the National Planning Policy Framework (the Framework). The 'development plan' for Tendring comprises, in part, Sections 1 and 2 of the Tendring District Council 2013-33 and Beyond Local Plan (adopted January 2021 and January 2022, respectively), together with any neighbourhood plans that have been brought into force.

5. Officer Appraisal (including Site Description and Proposal)

Application Site

The application site comprises of a section of pavement outside of a small number of commercial units within a local village centre. The existing buildings in the area typically being older in age serving commercial premises to the ground floor and residential above.

Proposal

This application seeks advertisement consent for the proposed installation of BT Street Hub and associated display of advertisement to both sides of unit.

The new street hub structure contains advertisements on both sides of the unit. This unit will be an electronic advertisement and will have other benefits such as WIFI and emergency services calling.

Assessment

Design and Appearance

Paragraph 130 of the National Planning Policy Framework 2021 (NPPF) requires that developments are visually attractive as a result of good architecture, are sympathetic to local character and history, including the surrounding built environment, function well and add to the overall quality of the area, and establish or maintain a strong sense of place.

Paragraph 106 of the NPPF States that the quality and character of places can suffer when advertisements are poorly sited and designed. Advertisements should be subject to control only in the interests of amenity and public safety, taking account of cumulative impacts.

Adopted Tendring District Local Plan Section 1 (TDLPS1) Policy SP7 seeks high standards of design that responds positively to local character and context. Policy SPL3 of the Tendring District Local Plan 2013-2033 and Beyond Publication Draft (June 2017) state all new development must make a positive contribution to the quality of the local environment, and must relate well to its site and surroundings particularly in relation to its siting, scale and form.

The proposal will be located in front of a small number of commercial premises on a large area of pavement. The introduction of this illuminated digital advertisement unit by virtue of its size and design would appear as a prominent and harmful feature detrimental to visual amenity and the character and appearance of the local area.

The proposal is therefore considered not to respond accordingly to the character and appearance of the streetscene and locale and would result in a significantly harmful impact in terms of visual amenity.

Adopted Policy CP3 states that proposals for new telecommunications infrastructure will be supported where they utilise existing masts, buildings and other structures and where the applicant can demonstrate that: a) they will not cause significant and irremediable interference with other electrical equipment, air traffic services or instrumentation operated in the national interest; and b) the possibility of other planned development in the area interfering with broadcast and telecommunications has been considered and addressed.

Proposals for new masts, buildings or other structures associated with the communications network will only be approved where the applicant, in addition to meeting criteria a) and b) above, can demonstrate that: c) the development cannot, for practical or economic reasons, be incorporated into or onto existing masts, buildings and other structures; and d) the development will be sympathetically designed, having regard to its appearance and impact upon local visual amenity and camouflaged if necessary.

The proposed street hub is for a new standalone structure, however it is accepted that this is not a standard telecoms proposal and site sharing is very unlikely to be a viable possibility for this type of unit. However, the chosen siting and unsympathetic design in terms of its size and illumination would appear as an incongruous feature in the streetscene to the detriment of visual amenity and the character of the surrounding area.

Highway and Public Safety

Paragraph 106 of the NPPF States that the quality and character of places can suffer when advertisements are poorly sited and designed. A separate consent process within the planning system controls the display of advertisements, which should be operated in a way which is simple, efficient and effective. Advertisements should be subject to control only in the interests of amenity and public safety, taking account of cumulative impacts.

Policy CP2 of Part 2 of the Adopted Local Plan 2013-2033 and Beyond, also states that planning permission will not be granted if there would be an unacceptable impact on highway safety.

As indicated on drawing; BT STREETHUB CLN-201, the location of the unit will impact on the available footway width in a busy pedestrian friendly location and the proposal would create an obstruction where members of the public are entitled to pass and repass over highway land unobstructed. The interference which this proposal would engender for pedestrians would result in an unacceptable degree of hazard to pedestrian users to the detriment of general highway safety

ECC Highways Authority have been consulted on the application and object to the proposal. It is noted that the applicants are advised to seek consent from ECC who own the land before submitting applications on their land.

Other Considerations

Clacton is non parished and therefore comments of this nature are not required. There have been no letters of representation received.

Conclusion

The proposal is therefore considered contrary to local and national policy resulting in a significantly harmful impact to the visual amenity of the area and public safety. The benefits of the proposal such as public WIFI and emergency services calling are not considered to outweigh this harm.

6. Recommendation

Refusal - Full

7. Reasons for Refusal

- 1 Paragraph 130 of the National Planning Policy Framework 2021 (NPPF) requires that developments are visually attractive as a result of good architecture, are sympathetic to local character and history, including the surrounding built environment, function well and add to the overall quality of the area, and establish or maintain a strong sense of place.

Adopted Tendring District Local Plan Section 1 (TDLPS1) Policy SP7 seeks high standards of design that responds positively to local character and context. Adopted Policy CP3 states that proposals for new masts, buildings or other structures associated with the communications network will only be approved where the applicant can demonstrate that: c) the development cannot, for practical or economic reasons, be incorporated into or onto existing masts, buildings and other structures; and d) the development will be sympathetically designed, having regard to its appearance and impact upon local visual amenity and camouflaged if necessary.

The introduction of this illuminated digital advertisement unit by virtue of its unsympathetic design in terms of its size and illumination would appear as a prominent and harmful feature detrimental to visual amenity and the character and appearance of the local area.

The proposal is therefore considered not to respond accordingly to the character and appearance of the streetscene and locale and would result in a significantly harmful impact

in terms of visual amenity contrary to the above-mentioned policies of the Tendring District Local Plan 2013-33 and the relevant sections of the NPPF.

- 2 Policy CP2 of Part 2 of the Adopted Local Plan 2013-2033 and Beyond states that planning permission will not be granted if there would be an unacceptable impact on highway safety.

The unit will impact on the available footway width in a busy pedestrian friendly location and would create an obstruction where members of the public are entitled to pass and repass over highway land unobstructed. The interference which this proposal would engender for pedestrians, resulting in an unacceptable degree of hazard to pedestrian users to the detriment of general highway safety.

The proposal therefore conflicts with the above policies resulting in a harmful impact to public and highway safety contrary to the above-mentioned policies of the Tendring District Local Plan 2013-33 and the relevant sections of the NPPF.

8. **Informatives**

Positive and Proactive Statement

The Local Planning Authority has acted positively and proactively in determining this application by identifying matters of concern with the proposal and discussing those with the Applicant. However, the issues are so fundamental to the proposal that it has not been possible to negotiate a satisfactory way forward and due to the harm which has been clearly identified within the reason(s) for the refusal, approval has not been possible.

Plans and Supporting Documents

The Local Planning Authority has resolved to refuse the application for the reason(s) set out above. For clarity, the refusal is based upon the consideration of the plans and supporting documents accompanying the application as follows, (accounting for any updated or amended documents):

Existing and Proposed Site Photo
Street Hub Brochure
Product Statement
Planning Supporting Statement
Noise Management Plan
Frequently Asked Questions
Anti Social Behaviour Management Plan
Site and Location and Block Plan
Proposed Elevations

Are there any letters to be sent to applicant / agent with the decision? If so please specify:	YES	NO
Are there any third parties to be informed of the decision? If so, please specify:	YES	NO
