

2.1.3.2.2.1.6

At the end of every planting, attention should be given to the correct spacing and watering of the plants. The plants should be watered regularly during the first year, and then only when necessary. The plants should be kept free from weeds and other unwanted plants. The plants should be inspected regularly for signs of disease and pests. The plants should be pruned regularly to maintain their shape and size. The plants should be removed from the site if they are found to be diseased or infested with pests.

2.1.3.2.2.1.7

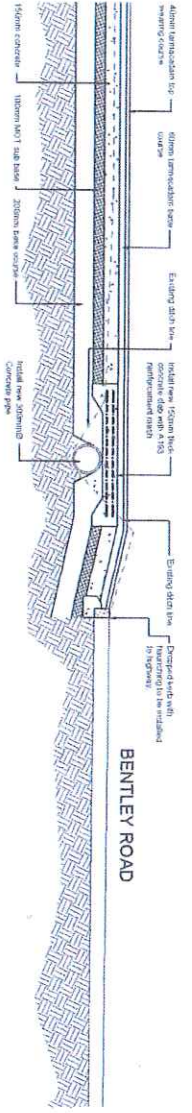

During the first two years, a good standard of maintenance should be achieved. The plants should be inspected regularly for signs of disease and pests. The plants should be pruned regularly to maintain their shape and size. The plants should be removed from the site if they are found to be diseased or infested with pests.

2.1.3.2.2.2

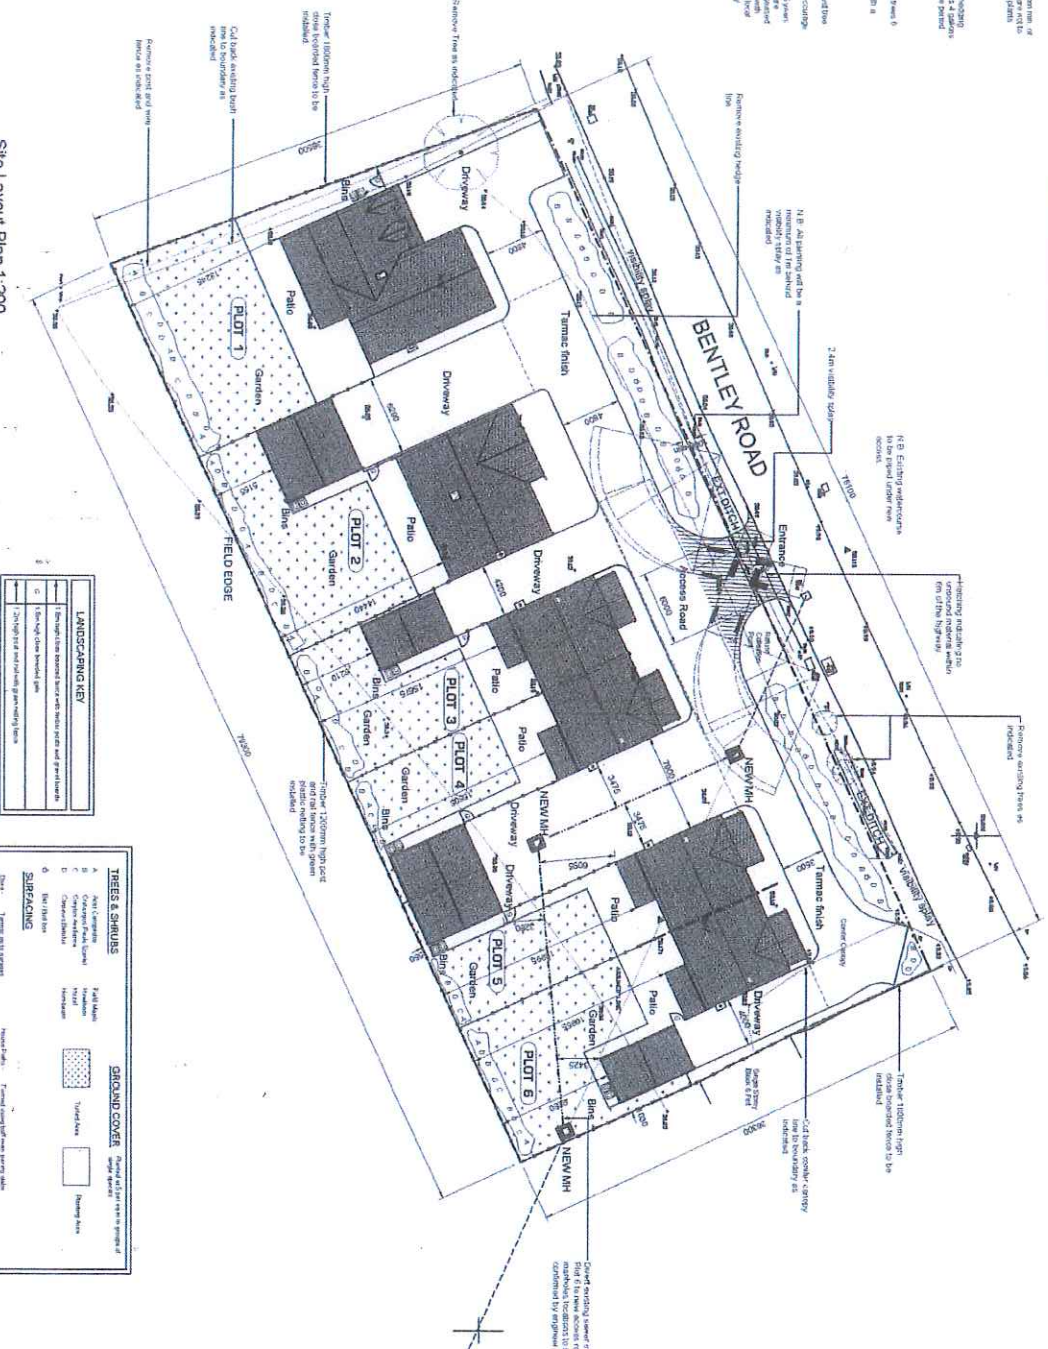

By the end of the third year, the plants should be well established and the site should be free from weeds and other unwanted plants. The plants should be inspected regularly for signs of disease and pests. The plants should be pruned regularly to maintain their shape and size. The plants should be removed from the site if they are found to be diseased or infested with pests.

2.1.3.2.2.3

During the last two years, a good standard of maintenance should be achieved. The plants should be inspected regularly for signs of disease and pests. The plants should be pruned regularly to maintain their shape and size. The plants should be removed from the site if they are found to be diseased or infested with pests.
