Application: 24/00001/FUL **Town / Parish:** Great Bromley Parish Council

Applicant: Mr Wayne Knowles

Address: Byeways Mary Lane North Great Bromley

Development: Erection of replacement detached chalet bungalow following demolition of existing bungalow.

1. Town / Parish Council

Great Bromley Parish Council No objections

2. Consultation Responses

ECC Highways Dept
26.01.2024

The information submitted with the application has been assessed by the Highway Authority and conclusions have been drawn from a desktop study with the observations below based on submitted material and google image dated March 2010. No site visit was undertaken in conjunction with this planning application. It is noted that the proposal is a replacement dwelling, and the site has an established vehicular access and no new or altered means of access is proposed as part of this application. Currently five off-street parking spaces for the existing dwelling is available and these will be retained for the new dwelling. It is not considered that the proposed dwelling would give rise to a significant increase in vehicle movements to and from the site or result in a material change in the character of the traffic in the vicinity of the site, considering these factors:

From a highway and transportation perspective the impact of the proposal is acceptable to Highway Authority subject to the following mitigation and conditions:

1. Prior to occupation of the development a minimum size 5 vehicular turning facility (8m x 8m), shall be constructed, surfaced, and maintained free from obstruction within the site at all times for that sole purpose.

Reason: To ensure that vehicles can enter and leave the highway in a forward gear in the interest of highway safety in accordance with policy DM1.

2. No unbound material shall be used in the surface treatment of the vehicular access within 6 metres of the highway boundary.

Reason: To avoid displacement of loose material onto the highway in the interests of highway safety in accordance with policy DM1.

3. The proposed dwelling shall not be occupied until such time as the vehicle parking area indicated on the approved plans, has been hard surfaced, and sealed. The vehicle parking area and associated turning area shall be retained in this form at all times. The vehicle parking shall not be used for any purpose other than the

parking of vehicles that are related to the use of the development unless otherwise agreed with the Local Planning Authority.

Reason: To ensure that on street parking of vehicles in the adjoining lane does not occur in the interests of highway safety and that appropriate parking is provided in accordance with Policy DM8.

4. The cycle / powered two-wheeler parking shall be provided in accordance with the EPOA Parking Standards. The approved facility shall be secure, convenient, covered and provided prior to occupation and retained at all times.

Reason: To ensure appropriate cycle / powered two-wheeler parking is provided in the interest of highway safety and amenity in accordance with Policy DM8.

5. Prior to commencement of the development, the areas within the curtilage of the site for the purpose of loading / unloading / reception and storage of building materials and manoeuvring of all vehicles, including construction vehicles shall be provided clear of the highway.

Reason: To ensure that appropriate loading / unloading facilities are available to ensure that the highway is not obstructed during the construction period in the interest of highway safety in accordance with policy DM1.

The above conditions are to ensure that the proposal conforms to the relevant policies contained within the County Highway Authority's Development Management Policies, adopted as County Council Supplementary Guidance in February 2011.

Informative:

1: All work within or affecting the highway is to be laid out and constructed by prior arrangement with and to the requirements and specifications of the Highway Authority; all details shall be agreed before the commencement of works.

The applicants should be advised to contact the Development Management Team by email at development.management@essexhighways.org

2: On the completion of the Development, all roads, footways/paths, cycle ways, covers, gratings, fences, barriers, grass verges, trees, and any other street furniture within the Site and in the area, it covers, and any neighbouring areas affected by it, must be left in a fully functional repaired/renovated state to a standard accepted by the appropriate statutory authority.

3: The applicant must ensure that no mud or detritus is taken onto the highway, such measures include provision of wheel cleaning facilities and sweeping/cleaning of the highway. Under Section 148 of the Highways Act 1980 it is an offence to deposit mud, detritus etc. on the highway. In addition, under Section 161 any person, depositing anything on a highway which results in a user of the highway being injured or endangered is guilty of an offence.

4: The Highway Authority cannot accept any liability for costs associated with a developer's improvement. This includes design check safety audits, site supervision, commuted sums for maintenance and any potential claims under Part 1 and Part 2 of the Land Compensation Act 1973. To protect the Highway Authority against such compensation claims a cash deposit or bond may be

Environmental Protection
17.01.2024

required.

With reference to the above application, please see below for comments from the EP Team:

Construction Activities: In order to minimise potential nuisance caused by demolition/construction works, Environmental Protection recommend that the following hours and actions be adhered to, should the application be approved;

- o No vehicle connected with the works to arrive on site before 07:30 or leave after 19:00 (except in the case of emergency). Working hours to be restricted between 08:00 and 18:00 Mondays to Saturdays (finishing at 13:00 on Saturdays) with no working of any kind permitted on Sundays or any Public/Bank Holiday whilst construction works and alterations are being carried out.

- o No materials produced as a result of the site development or clearance shall be burned on site.

Adherence to the above condition will significantly reduce the likelihood of public complaint and potential enforcement action by Pollution and Environmental Control. The condition gives the best practice for Demolition and Construction sites. Failure to follow them may result in enforcement action under nuisance legislation (Environmental Protection Act 1990), or the imposition of controls on working hours (Control of Pollution Act 1974).

REASON: to protect the amenity of nearby residential premises

Asbestos: If there is any asbestos present in the current building or site then adequate and suitable measures should be carried out for the minimisation of asbestos fibres during demolition, so as to prevent airborne fibres from affecting workers carrying out the work, and nearby properties. Only contractors licensed by the Health and Safety Executive should be employed. Any redundant materials removed from the site should be transported by a registered waste carrier and disposed of at an appropriate legal tipping site.

REASON: to protect the health of workers and nearby existing residents

*INFORMATIVE -

Foul Drainage: The submitted Planning Application indicates a Sewerage Treatment Plant will be utilised as a way of disposing of foul waste; we would request, should the application be approved, that the Applicant / Agent, ensure the installation is fully compliant with the Environment Agency's Binding Rules and any other relevant Government guidance and British standards, in respect of these systems. Information on this can be found at: Septic tanks and treatment plants: permits and general binding rules: The general binding rules - GOV.UK (www.gov.uk). It is strongly recommended these rules are complied with, as they will minimise any potential nuisance to nearby residential dwellings, assist in preventing a potential Public Health nuisance, and minimise the potential for adverse incidents, of which may result in formal enforcement action.

REASON: to protect the health of residents and nearby residential premises

Tree & Landscape Officer 15.01.2024 No significant trees or other important vegetation will be adversely affected by the proposed development.

4. Status of the Local Plan

Planning law requires that decisions on applications must be taken in accordance with the development plan unless there are material considerations that indicate otherwise (Section 70(2) of the 1990 Town and Country Planning Act and Section 38(6) of the Planning and Compulsory Purchase Act 2004). This is set out in Paragraph 2 of the National Planning Policy Framework (the Framework). The 'development plan' for Tendring comprises, in part, Sections 1 and 2 of the Tendring District Council 2013-33 and Beyond Local Plan (adopted January 2021 and January 2022, respectively), supported by our suite of evidence base core documents (<https://www.tendringdc.uk/content/evidence-base>) together with any neighbourhood plans that have been brought into force.

5. Neighbourhood Plans

A neighbourhood plan introduced by the Localism Act that can be prepared by the local community and gives communities the power to develop a shared vision for their area. Neighbourhood plans can shape, direct and help to deliver sustainable development, by influencing local planning decisions as part of the statutory development plan to promote development and uphold the strategic policies as part of the Development Plan alongside the Local Plan. Relevant policies are considered in the assessment. Further information on our Neighbourhood Plans and their progress can be found via our website <https://www.tendringdc.uk/content/neighbourhood-plans>

7. **Officer Appraisal**

Application Site

The application site comprises of a detached chalet bungalow located outside of the development boundary. The house is significantly set back from the highway with planting in situ along the front.

The house itself has previously been altered before by way of first floor and ground floor additions.

Proposal

This application seeks planning permission for the erection of replacement detached chalet bungalow following demolition of existing bungalow.

Assesment

Visual Impact

The existing house is currently significantly set back from the front boundary of the site and situated behind a neighbouring house known as "Frost Hall." The house has previously been extended many times and has recently received planning permission under reference 22/01620/FULHH for further enlargements. The design and scale of the house proposed incorporates the enlargements approved under this previous planning permission.

The replacement house will sit in the same position as the existing dwelling which is set back from the highway. The footprint will mirror that of the existing dwellings and will incorporate the extensions approved under 22/01620/FULHH.

Due to the lack of planting and neighbours to the southeast the proposal will be most publicly noticeable from the side. The plans show that the house which will reflect the design and scale shown on the plans approved under 22/01620/FULHH for the previous extension.

Despite being visible from this angle, the replacement dwelling would be of a suitable size in relation to the plot and surrounding area with its set back from the front and side boundaries reducing its prominence, thereby preventing it from having a significant harmful impact to the appearance and character of the locale.

The existing house is finished in brick with parts of the proposal matching this, however some elements will comprise of a mixture of render and boarding, which will be similar in colour and will appear as a suitable contrast between the different projections of the building. Given the lack of nearby houses there is no uniform set in terms of materials and therefore the use of such in this regard is acceptable.

The site is located outside of the defined settlement boundary; however, is acceptable in terms of design and scale and is not considered to result in a harmful impact to the appearance/ character of the rural landscape.

The site benefits from a large rear garden space and whilst the footprint of the new house will be larger compared to the existing structure a usable and suitably sized area of private amenity space will still be retained.

Highway Safety

The Essex County Council Parking Standards states that where a house comprises of two or more bedrooms that 2no parking spaces should be retained which measure 5.5m by 2.9m per space. Part of the proposal will be to the side upon the existing driveway.

Whilst this will result in a loss of parking the house is set back from the front boundary with a large driveway which is suitable in size to still accommodate the parking of two vehicles in line with the above.

The plans show that the existing access will be retained and will continue to be used in the same way on construction of the proposal.

The proposal will therefore not contravene highway safety.

Impact to Neighbours

The proposed replacement dwelling will be sited ample distance away from the boundary shared with "Frost Hall" and will not result in a significant loss of light and outlook to this neighbouring site.

The dormer windows will be sited in the front elevation and due to the layout of the plot and its relationship with Frost Hall will achieve some views into this neighbouring property and its garden. Given that the host dwelling already overlooks this house and, because of the distance away from of the proposal from this neighbour, any views will be minimal and will not result in a significant loss of privacy to this neighbour which would require the refusal of this application.

The proposal does include large rearward facing openings and a balcony. These elements will be to the rear and not visible to the neighbouring property. The neighbour is set forward of the host dwelling meaning that these new additions will not be able to achieve views into this neighbour's garden/ house and would therefore not result in additional overlooking.

Landscaping

The block plan shows ample planting around the site which will suitably screen and soften the proposal within the locale. No significant trees or other important vegetation will be adversely affected by the proposed development. The Council's Tree and Landscape Officer has been consulted as part of the application and raises no objections to the scheme.

Legal Obligations/ Contributions

A legal agreement to cover RAMS and Open Space contributions are not required for this application as the proposal is for a replacement dwelling.

Drainage

The application forms state that the proposal will make use of a septic tank to accommodate the drainage at the site. This remains unchanged from the current situation.

Ecology and Biodiversity

The Natural Environment and Rural Communities Act 2006 amended by the Environment Act 2021 provides under Section 40 the general duty to conserve and enhance biodiversity: "For the purposes of this section "the general biodiversity objective" is the conservation and enhancement of biodiversity in England through the exercise of functions in relation to England." Section 40 states authorities must consider what actions they can take to further the general biodiversity objective and determine policies and specific objectives to achieve this goal. The actions mentioned include conserving, restoring, or enhancing populations of particular species and

habitats. In conclusion for decision making, it is considered that the Local Planning Authority must be satisfied that the development would conserve and enhance.

This development is subject to the general duty outlined above. An informative has been imposed strongly encouraging the applicant to improve the biodiversity of the application site through appropriate additional planting and wildlife friendly features. Therefore, the development on balance, with consideration of the impact of the development and baseline situation on site, is considered likely to conserve and enhance biodiversity interests.

Biodiversity net gain

Biodiversity net gain (BNG) is an approach that aims to leave the natural environment in a measurably better state than it was beforehand. The minimum requirement is for a 10% net gain in biodiversity value achieved on a range of development proposals (excluding Listed Building Consent, Advert Consent, Reserved Matters, Prior Approvals, Lawful Certificates, householders, self builds, and other types of application which are below the threshold i.e. does not impact a priority habitat and impacts less than 25 sq.m of habitat, or 5m of linear habitats such as hedgerow).

This scheme is currently pointed towards applications which fall into the "Major" category. As the proposal is for a replacement of one dwelling it does not fall within this category at present and therefore is not required for this application.

Protected Designated Habitats

The site falls within the recreational Zone of Influence (ZOI) of the Essex Coast Recreational disturbance Avoidance and Mitigation Strategy (RAMS). Under the Habitats Regulations, a development which is likely to have a significant effect or an adverse effect (alone or in combination) on a European designated site must provide mitigation or otherwise must satisfy the tests of demonstrating 'no alternatives' and 'reasons of overriding public interest'. There is no precedent for a residential development meeting those tests, which means that all residential development must provide mitigation.

The proposal is for a replacement dwelling of a similar design and footprint to the host building and therefore will not incur the need for RAMS mitigation in this instance.

Renewable Energy

Chapter 14 of the National Planning Policy Framework supports the transition to a low carbon future in a changing climate while Policy PPL10 of the Local Plan supports renewable energy generation and energy efficiency measures for residential development.

No energy efficiency measures have been submitted with the planning application and therefore a condition to secure minimum measures of a water-butt and compost bin, agreement of heating for the dwelling and a scheme for waste reduction along with provision of solar panels will be secured on the grant of planning permission to reduce the demand for fossil fuels which are a finite resource and release carbon into the atmosphere and accelerate global warming contributing to climate change.

Protected Species

In accordance with Natural England's standing advice the proposed development site and surrounding habitat have been assessed for potential impacts on protected species. It is considered that the proposal is unlikely to adversely impact upon protected species or habitats.

Conclusion

In accordance with the overarching duty outlined above, this development is considered to accord to best practice, policy, and legislation requirements in consideration of the impacts on ecology interests.

Other Considerations

Great Bromley Parish Council have no objections to the proposal.

There have been no letters of representation received.

Environmental Health have been consulted as part of the application and have no objection subject to a condition restricting working hours and vehicle movements and a condition restricting the burning or materials to be placed upon the planning permission.

Conclusion

The proposal is therefore considered to be compliant with national and local policy as assessed in the above report. In the absence of material harm resulting from the proposed development the application is recommended for approval.

8. Recommendation

Approval - Full

9. Conditions

1 COMPLIANCE REQUIRED: COMMENCEMENT TIME LIMIT

CONDITION: The development hereby permitted shall be begun not later the expiration of three years from the date of this permission.

REASON: To comply with the requirements of Section 91 of the Town and Country Planning Act 1990 as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

NOTE/S FOR CONDITION:

The development needs to commence within the timeframe provided. Failure to comply with this condition will result in the permission becoming lapsed and unable to be carried out. If commencement takes place after the time lapses this may result in unlawful works at risk Enforcement Action proceedings. You should only commence works when all other conditions requiring agreement prior to commencement have been complied with.

2 APPROVED PLANS & DOCUMENTS

CONDITION: The development hereby permitted shall be carried out in accordance with the drawings/documents listed below and/or such other drawings/documents as may be approved by the Local Planning Authority in writing pursuant to other conditions of this permission or such drawings/documents as may subsequently be approved in writing by the Local Planning Authority as a non-material amendment following an application in that regard (except for Listed Building Consents). Such development hereby permitted shall be carried out in accordance with any Phasing Plan approved, or as necessary in accordance with any successive Phasing Plan as may subsequently be approved in writing by the Local Planning Authority prior to the commencement of development pursuant to this condition.

P002 H

REASON: For the avoidance of doubt and in the interests of proper phased planning of the development.

NOTE/S FOR CONDITION:

The primary role of this condition is to confirm the approved plans and documents that form the planning decision. Any document or plan not listed in this condition is not approved, unless otherwise separately referenced in other conditions that also form this decision. The second role of this condition is to allow the potential process of Non Material Amendment if found necessary and such future applications shall be considered on their merits. Lastly, this condition also allows for a phasing plan to be submitted for consideration as a discharge of condition application should phasing be needed by the developer/s if not otherwise already approved as part of this permission. A phasing plan submission via this condition is optional and not a requirement.

Please note in the latest revision of the National Planning Policy Framework (NPPF) it provides that Local Planning Authorities should seek to ensure that the quality of approved development is not materially diminished between permission and completion, as a result of changes being made to the permitted scheme (for example through changes to approved details such as the materials used). Accordingly, any future amendment of any kind will be considered in line with this paragraph, alongside the Development Plan and all other material considerations.

Any indication found on the approved plans and documents to describe the plans as approximate and/or not to be scaled and/or measurements to be checked on site or similar, will not be considered applicable and the scale and measurements shown shall be the approved details and used as necessary for compliance purposes and/or enforcement action.

3 HIGHWAYS CONDITION

CONDITION: No unbound material shall be used in the surface treatment of the vehicular access within 6 metres of the carriageway.

REASON: To avoid displacement of loose material onto the carriageway in the interests of highway safety.

4 FURTHER APPROVAL - CONSTRUCTION MANAGEMENT TO BE AGREED (PRE COMMENCEMENT)

CONDITION: Prior to the commencement of development details of the construction methodology and timetable shall be submitted to and approved, in writing, by the Local Planning Authority. This shall incorporate the following information:-

- a) Details of the hours of work/construction of the development within which such operations shall take place and the hours within which delivery/collection of materials for the said construction shall take place at the site.
- b) Details of the loading/unloading/storage of construction materials on site, including details of their siting and maximum storage height.
- c) Details of how construction and worker traffic and parking shall be managed. This shall include routing of all traffic and any directional signs to be installed and where.
- d) Details of any protection measures for footpaths and trees surrounding the site.
- e) Details of any means of access to the site during construction.
- f) Details of the scheduled timing/phasing of development for the overall construction period.
- g) Details of measures to control the emission of dust and dirt during construction, and including details of any wheel washing to be undertaken, management and location it is intended to take place.
- h) Details of the siting of any on site compounds and portaloos.
- i) Details of the method of any demolition to take place, including the recycling and disposal of said materials resulting from demolition.
- j) Site waste management plan (that shall include reuse and recycling of materials)
- k) Scheme for sustainable construction management to ensure effective water and energy use.
- l) Scheme of review of complaints from neighbours.
- m) Registration and details of a Considerate Constructors Scheme
- n) Details on the provision, location and management of any show home/s or reception, including opening times, parking and advertisements (including flags and directional signs).

The said methodology as may be approved shall be implemented in its entirety and shall operate as may be approved at all times during construction.

REASON: To minimise detriment to nearby residential and general amenity by controlling the construction process to achieve the approved development. This condition is required

to be agreed prior to the commencement of any development as any construction process, including site preparation, by reason of the location and scale of development may result adverse harm on amenity.

NOTE/S FOR CONDITION:

You are strongly advised to discuss this condition with the Local Planning Authority and if possible/available local residents likely to be affected by this development prior to submission of details.

5 HIGHWAYS PROVISION OF PARKING AND TURNING

CONDITION: The hereby approved development shall not be first occupied until such time as the areas for purposes of manoeuvring and parking of vehicles has been provided and made functionally available. The area shall then be retained and remain free of obstruction thereafter.

REASON: To ensure that on street parking of vehicles in the adjoining streets does not occur in the interests of highway safety and that appropriate parking and layout is provided To ensure the provision of adequate on-site space for the parking and manoeuvring of vehicles where on-street parking and manoeuvring would otherwise be detrimental to highway safety.

6 AGREEMENT OF MEASURES TO IMPROVE SUSTAINABILITY OF DEVELOPMENT

CONDITION: No development shall commence above slab level until a scheme for the provision and implementation of water, energy and resource efficiency measures for the lifetime of the development shall be submitted to and approved, in writing, by the Local Planning Authority. The scheme shall include as a minimum:-

- An electric car charging point.
- Agreement of a scheme for water conservation including greywater recycling and rainwater capture/re-use.
- Agreement of a scheme to achieve as far as possible a water consumption rate of not more than 110 litres, per person, per day for the dwelling.
- Agreement of heating of each dwelling/building
- Agreement of scheme for waste reduction
- Provision of a fibre optic broadband connection to the best possible speed installed on an open access basis and directly accessed from the nearest exchange, incorporating the use of resistant tubing. (If the applicant is unable to achieve this standard of connection, and can evidence through consultation that this would not be possible, practical or economically viable an alternative superfast (i.e. will provide speeds greater than 30mbps) wireless service will be considered.)

The scheme shall be fully implemented prior to the first occupancy of the development unless otherwise agreed in writing by the Local Planning Authority. The scheme shall be constructed and the measures provided and made available for use as may be agreed and thereafter shall be maintained.

REASON: To enhance the sustainability of the development through reduced need, better use or savings in the use of water, energy and resources; reduced harm to the environment; and result in wider public benefit in accordance with the NPPF.

NOTES FOR CONDITION:

Slab level normally refers to the concrete slab supported on foundations or directly on the subsoil and is used to construct the ground floor of the development. In any other case, please assume slab level to be the point before any walls and/or development can be visualised above ground level or seek confirmation from the Local Planning Authority for your development.

Broadband provision is included to ensure the development is able to be equipped with high speed broadband to enable opportunities for web-based communication and homeworking reducing the need for unsustainable travel.

A water consumption rate of not more than 110 litres, per person, per day adopted as Planning Policy and as imposed by this condition will directly change the building regulations water consumption rate to match as a result of this policy. The introduction of effective utilities, rainwater capture for watering plants, aerators to taps and other water saving options can be considered.

10. Informatives

Positive and Proactive Statement

The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

Environmental Protection Informative

Adherence to the above condition will significantly reduce the likelihood of public complaint and potential enforcement action by Pollution and Environmental Control. The condition gives the best practice for Demolition and Construction sites. Failure to follow them may result in enforcement action under nuisance legislation (Environmental Protection Act 1990), or the imposition of controls on working hours (Control of Pollution Act 1974).

Asbestos: If there is any asbestos present in the current building or site then adequate and suitable measures should be carried out for the minimisation of asbestos fibres during demolition, so as to prevent airborne fibres from affecting workers carrying out the work, and nearby properties. Only contractors licensed by the Health and Safety Executive should be employed. Any redundant materials removed from the site should be transported by a registered waste carrier and disposed of at an appropriate legal tipping site.

Foul Drainage: The submitted Planning Application indicates a Sewerage Treatment Plant will be utilised as a way of disposing of foul waste; we would request, should the application be approved, that the Applicant / Agent, ensure the installation is fully compliant with the Environment Agency's Binding Rules and any other relevant Government guidance and British standards, in respect of these systems. Information on this can be found at: Septic tanks and treatment plants: permits and general binding rules: The general binding rules - GOV.UK (www.gov.uk). It is strongly recommended these rules are complied with, as they will minimise any potential nuisance to nearby residential dwellings, assist in preventing a potential Public Health nuisance, and minimise the potential for adverse incidents, of which may result in formal enforcement action.

Highways Informative:

The above conditions are to ensure that the proposal conforms to the relevant policies contained within the County Highway Authority's Development Management Policies, adopted as County Council Supplementary Guidance in February 2011.

1 All work within or affecting the highway is to be laid out and constructed by prior arrangement with and to the requirements and specifications of the Highway Authority; all details shall be agreed before the commencement of works.

The applicants should be advised to contact the Development Management Team by email at development.management@essexhighways.org

2 On the completion of the Development, all roads, footways/paths, cycle ways, covers, gratings, fences, barriers, grass verges, trees, and any other street furniture within the Site and in the area, it covers, and any neighbouring areas affected by it, must be left in a fully functional repaired/renovated state to a standard accepted by the appropriate statutory authority.

3 The applicant must ensure that no mud or detritus is taken onto the highway, such measures include provision of wheel cleaning facilities and sweeping/cleaning of the highway. Under Section 148 of the Highways Act 1980 it is an offence to deposit mud, detritus etc. on the highway. In addition, under Section 161 any person, depositing anything on a highway which results in a user of the highway being injured or endangered is guilty of an offence.

4 The Highway Authority cannot accept any liability for costs associated with a developers improvement. This includes design check safety audits, site supervision, commuted sums for maintenance and any potential claims under Part 1 and Part 2 of the Land Compensation Act 1973. To protect the Highway Authority against such compensation claims a cash deposit or bond may be required.

Biodiversity Informative

In accordance with the Council's general duty to conserve and enhance biodiversity, you are strongly encouraged to improve the biodiversity of the application site through appropriate additional planting and wildlife friendly features.

11. Equality Impact Assessment

In making this recommendation/decision regard must be had to the public sector equality duty (PSED) under section 149 of the Equality Act 2010 (as amended). This means that the Council must have due regard to the need in discharging its functions that in summary include A) Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act; B. Advance equality of opportunity between people who share a protected characteristic* (See Table) and those who do not; C. Foster good relations between people who share a protected characteristic* and those who do not, including tackling prejudice and promoting understanding.

In the present context, it has been carefully evaluated that the recommendation articulated in this report and the consequent decision are not expected to disproportionately affect any protected characteristic* adversely. The PSED has been duly considered and given the necessary regard, as expounded below.

Protected Characteristics *	Analysis	Impact (As known with application)
Age	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Disability	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
