

DELEGATED DECISION OFFICER REPORT

AUTHORISATION	INITIALS	DATE
Planning Officer recommendation:	AP	10/04/2024
Team Leader authorisation / sign off:	AN	11/04/24
Assistant Planner final checks and despatch:	ER	11/04/2024

Application: 24/00342/COUNOT **Town / Parish:** Tendring Parish Council

Applicant: Mr Edgar

Address: Greentrees Farm Stones Green Road Tendring

Development: Prior Approval Application under Part 3, Class Q of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) for conversion and change of use of agricultural building to one dwelling, with alterations.

1. Town / Parish Council

Tendring Parish Council The Parish Council were notified of the Prior Approval application however no comments were invited.

2. Consultation Responses

ECC Highways Dept
02.04.2024 Whilst the site is located in the countryside, it is not considered that the use of the building as a dwelling would give rise to a significant increase in vehicle movements to and from the site or result in a material change in the character of the traffic in the vicinity of the site.

The documents accompanying the planning application have been duly considered. Given the scale of the proposed development and the area to be available for parking within the site, which complies with Tendring District Councils adopted parking standards, the proposal is acceptable to the Highway Authority.

1. Each vehicular parking space shall have minimum dimensions of 2.9 metres x 5.5 metres.

Reason: To ensure adequate space for parking off the highway is provided in the interest of highway safety in accordance with Policy DM8

2. Cycle parking shall be provided in accordance with the EPOA Parking Standards. The approved facility shall be secure, convenient, covered and provided prior to occupation and retained at all times.

Reason: To ensure appropriate cycle parking is provided in the interest of highway safety and amenity in accordance with Policy DM8.

3. Prior to occupation of the proposed development, the Developer shall be responsible for the provision and implementation of a Residential Travel Information Pack per dwelling, for sustainable transport, approved by Essex County Council.

Reason: In the interests of reducing the need to travel by car and promoting sustainable development and transport in accordance with policies DM9 and DM10 of the Highway Authority's Development Management Policies, adopted as County Council Supplementary Guidance in February 2011

The above conditions are to ensure that the proposal conforms to the relevant policies contained within the County Highway Authority's Development Management Policies, adopted as County Council Supplementary Guidance in February 2011.

Informative:

1: All work within or affecting the highway is to be laid out and constructed by prior arrangement with and to the requirements and specifications of the Highway Authority; all details shall be agreed before the commencement of works.

The applicants should be advised to contact the Development Management Team by email at development.management@essexhighways.org

2: On the completion of the Development, all roads, footways/paths, cycle ways, covers, gratings, fences, barriers, grass verges, trees, and any other street furniture within the Site and in the area, it covers, and any neighbouring areas affected by it, must be left in a fully functional repaired/renovated state to a standard accepted by the appropriate statutory authority.

3: The Highway Authority cannot accept any liability for costs associated with a developer's improvement. This includes design check safety audits, site supervision, commuted sums for maintenance and any potential claims under Part 1 and Part 2 of the Land Compensation Act 1973. To protect the Highway Authority against such compensation claims a cash deposit or bond may be required

Environmental Protection
06.03.2024

With reference to the above application, please see below for comments from the EP Team:

Contaminated Land: given the sites proximity to historical agricultural land the EP Team are requesting a Watching Brief be conditioned (on any subsequent approval) and adhered to throughout the demolition and construction phase. We request that the LPA are contacted in the event of unexpected ground conditions being encountered during construction and that the below minimum precautions are undertaken until such time as the LPA responds to the notification. I would also advise that the developer is made aware that the responsibility for the safe development of the site lies with them.

Minimum requirements for dealing with unexpected ground conditions being encountered during construction.

1. All site works at the position of the suspected contamination will stop and the Local Planning Authority and Environmental Health Department will be notified as a matter of urgency.

2. A suitably trained geo-environmental engineer should assess the visual and olfactory observations of the ground and the extent of contamination and the Client and the Local Authority should be informed of the discovery.

3. The suspected contaminated material will be investigated and tested appropriately in accordance with assessed risks. The investigation works will be carried out in the presence of a suitably qualified geo-environmental engineer. The investigation works will involve the collection of solid samples for testing and, using visual and

olfactory observations of the ground, delineate the area over which contaminated materials are present.

4. The unexpected contaminated material will either be left in situ or be stockpiled (except if suspected to be asbestos) whilst testing is carried out and suitable assessments completed to determine whether the material can be re-used on site or requires disposal as appropriate.

5. The testing suite will be determined by the independent geo-environmental specialist based on visual and olfactory observations.

6. Test results will be compared against current assessment criteria suitable for the future use of the area of the site affected.

7. Where the material is left in situ awaiting results, it will either be reburied or covered with plastic sheeting.

8. Where the potentially contaminated material is to be temporarily stockpiled, it will be placed either on a prepared surface of clay, or on 2000-gauge Visqueen sheeting (or other impermeable surface) and covered to prevent dust and odour emissions.

9. Any areas where unexpected visual or olfactory ground contamination is identified will be surveyed and testing results incorporated into a Verification Report.

10. A photographic record will be made of relevant observations.

11. The results of the investigation and testing of any suspect unexpected contamination will be used to determine the relevant actions. After consultation with the Local Authority, materials should either be: o re-used in areas where test results indicate that it meets compliance targets so it can be re-used without treatment; or o treatment of material on site to meet compliance targets so it can be re-used; or o removal from site to a suitably licensed landfill or permitted treatment facility.

12. A Verification Report will be produced for the work.

REASON: It is the responsibility of the developer to ensure the safe development of the site and to carry out any appropriate land contamination investigation and remediation works. The condition is to ensure the risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors

Construction Activities: In order to minimise potential nuisance caused by construction, Environmental Protection recommend that the following below is conditioned:

- No vehicle connected with the works to arrive on site before 07:30 or leave after 19:00 (except in the case of emergency). Working hours to be restricted between 08:00 and 18:00 Mondays to Saturdays (finishing at 13:00 on Saturdays) with no working of any kind permitted on Sundays or any Public/Bank Holiday whilst construction works and alterations are being carried out.

- No materials produced as a result of the site development or clearance shall be burned on site.

Adherence to the above condition will significantly reduce the likelihood of public complaint and potential enforcement action by Pollution and Environmental Control. The condition gives the best practice for Demolition and Construction sites. Failure to follow them may result in enforcement action under nuisance legislation

(Environmental Protection Act 1990), or the imposition of controls on working hours (Control of Pollution Act 1974).

***INFORMATIVE**

Asbestos: Should any asbestos containing materials be present on the development site, or used within the original construction of the building in question, it must be safely removed by a qualified contractor, with relevant transfer notes being obtained to confirm safe and responsible removal and disposal.

REASON: to protect the health of site workers and end users

*INFORMATIVE Foul Drainage: The planning statement indicates a Sewerage Treatment Plant will be utilised as a way of disposing of foul waste; we would request, should the application be approved, that the Applicant / Agent, ensure the installation is fully compliant with the Environment Agency's Binding Rules and any other relevant Government guidance and British standards, in respect of these systems. Information on this can be found at: Septic tanks and treatment plants: permits and general binding rules: The general binding rules - GOV.UK (www.gov.uk). It is strongly recommended these rules are complied with, as they will minimise any potential nuisance to nearby residential dwellings, assist in preventing a potential Public Health nuisance, and minimise the potential for adverse incidents, of which may result in formal enforcement action.

3. Planning History

93/01245/FUL	(Greentrees Farm, Tendring) Change of use from manufacture of horse boxes to manufacture and assembly of light vehicle bodies	Refused	04.01.1994
93/01436/FUL	(Greentrees Farm, Tendring) Continued use of premises for steel fabrication and horsebox repair and manufacture	Refused	08.03.1994
95/00289/FUL	Change of use of barn from light engineering to equine training and erection of two stables	Approved	27.06.1995
96/01542/FUL	Continued use of premises for Equine Training and retention of 2 stables as permanent renewal of TEN/95/0284	Approved	21.01.1997
20/01380/FUL	Change of use to a residential dwelling and associated works.	Approved	08.02.2021
23/00810/COUNO T	Prior Approval Application under Part 3, Class Q of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) for conversion and change of use of agricultural building to four dwellings, with alterations.	Determination	11.09.2023

24/00342/COUNO T Prior Approval Application under Part 3, Current Class Q of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) for conversion and change of use of agricultural building to one dwelling, with alterations.

4. Status of the Local Plan

Planning law requires that decisions on applications must be taken in accordance with the development plan unless there are material considerations that indicate otherwise (Section 70(2) of the 1990 Town and Country Planning Act and Section 38(6) of the Planning and Compulsory Purchase Act 2004). This is set out in Paragraph 2 of the National Planning Policy Framework (the Framework). The 'development plan' for Tendring comprises, in part, Sections 1 and 2 of the Tendring District Local Plan 2013-33 and Beyond (adopted January 2021 and January 2022, respectively), supported by our suite of evidence base core documents (<https://www.tendringdc.uk/content/evidence-base>) together with any Neighbourhood Plans that have been made and the Minerals and Waste Local Plans adopted by Essex County Council.

In relation to housing supply:

The Framework requires Councils to significantly boost the supply of homes to meet the District's housing need. However, the revised Framework, published on 19th December 2023, sets out in Paragraph 76 that (for applications made on or after the date of publication of this version of the Framework) local planning authorities are not required to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing for decision making purposes if the following criteria are met:

- their adopted plan is less than five years old; and
- that adopted plan identified at least a five-year supply of specific, deliverable sites at the time that its examination concluded.

The adopted Local Plan meets these criteria.

Notwithstanding this updated provision, the Council will continue to demonstrate an updated supply of specific deliverable sites within its Strategic Housing Land Availability Assessment (SHLAA), which is published annually. The most recent SHLAA was published by the Council in November 2023, and demonstrates a 6.44-year supply of deliverable housing sites against the annual requirement of 550 dwellings per annum set out within the adopted Local Plan, plus a 5% buffer to ensure choice and competition in the market. (The SHLAA can be viewed on the Council's website: <https://www.tendringdc.gov.uk/content/monitoring-and-shlaa>)

On 19th December 2023 the Government published the Housing Delivery Test (HDT) 2022 measurement. Against a requirement for 1,420 homes for 2019-2022, the total number of homes delivered was 2,207. The Council's HDT 2022 measurement was therefore 155%. As a result, the 'tilted balance' at paragraph 11 d) of the Framework does not apply to decisions relating to new housing development.

5. Neighbourhood Plans

A neighbourhood plan introduced by the Localism Act that can be prepared by the local community and gives communities the power to develop a shared vision for their area. Neighbourhood plans can shape, direct and help to deliver sustainable development, by influencing local planning decisions as part of the statutory development plan to promote development and uphold the strategic policies as part of the Development Plan alongside the Local Plan. Relevant policies are considered in the assessment. Further information on our Neighbourhood Plans and their progress can be found via our website <https://www.tendringdc.uk/content/neighbourhood-plans>

6. Relevant Policies / Government Guidance

7. Officer Appraisal

Schedule 2, Part 3, Class Q of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended) - agricultural buildings to dwellinghouses

Q. Development consisting of –

(a) a change of use of a building and any land within its curtilage from a use as an agricultural building to a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order; or
(b) development referred to in paragraph (a) together with building operations reasonably necessary to convert the building referred to in paragraph (a) to a use falling within Class C3 (dwellinghouses) of that Schedule.

Q.1 Development is not permitted by Class Q if -

(a) the site was not used solely for an agricultural use as part of an established agricultural unit –

(i) on 20th March 2013, or

(ii) in the case of a building which was in use before that date but was not in use on that date, when it was last in use, or

(iii) in the case of a site which was brought into use after 20th March 2013, for a period of at least 10 years before the date development under Class Q begins;

The application form confirms that site was used solely for an agricultural use as part of an established agricultural unit on 20th March 2013. The proposal complies.

(b) in the case of –

(i) a larger dwellinghouse, within an established agricultural unit -

(aa) the cumulative number of separate larger dwellinghouses developed under Class Q exceeds 3;
or

(bb) the cumulative floor space of the existing building or buildings changing use to a larger dwellinghouse or dwellinghouses under Class Q exceeds 465 square metres;

(ba) the floor space of any dwellinghouse developed under Class Q having a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order exceeds 465 square metres;

In this case the proposal is 159 square metres and is a larger dwellinghouse. No other larger dwellinghouses have previously been created/approved under this permitted development right on this established agricultural unit. The proposal complies.

(c) in the case of -

(i) a smaller dwellinghouse, within an established agricultural unit -

(aa) the cumulative number of separate smaller dwellinghouses developed under Class Q exceeds 5; or

(bb) the floor space of any one separate smaller dwellinghouse having a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order exceeds 100 square metres;

4 smaller dwellinghouses were approved under Class Q under application reference 23/00810/COUNOT, therefore the proposal complies as it is for a larger dwellinghouse.

(d) the development under Class Q (together with any previous development under Class Q) within an established agricultural unit would result in either or both of the following -

(i) a larger dwellinghouse or larger dwellinghouses having more than 465 square metres of floor space having a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order;

(ii) the cumulative number of separate dwellinghouses having a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order exceeding 5;

The development under Class Q (together with any previous development under Class Q) within an established agricultural unit would not result in either or both a larger dwellinghouse or larger dwellinghouses having more than 465 square metres of floor space, and/or the cumulative number of separate dwellinghouses having a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order does not exceed 5. The proposal complies.

(e) the site is occupied under an agricultural tenancy, unless the express consent of both the landlord and the tenant has been obtained;

The site is not occupied under an agricultural tenancy. The proposal complies.

(f) less than 1 year before the date development begins -

(i) an agricultural tenancy over the site has been terminated, and

(ii) the termination was for the purpose of carrying out development under Class Q, unless both the landlord and the tenant have agreed in writing that the site is no longer required for agricultural use;

Less than one year before the date development begins an agricultural tenancy over the site has not been terminated. The proposal complies.

(g) development under Class A(a) or Class B(a) of Part 6 of this Schedule (agricultural buildings and operations) has been carried out on the established agricultural unit -

(i) since 20th March 2013; or

(ii) where development under Class Q begins after 20th March 2023, during the period which is 10 years before the date development under Class Q begins;

No development under Class A(a) or Class B(a) of Part 6 of this Schedule (agricultural buildings and operations) has been carried out on the established agricultural unit since 20th March 2013 or where development under Class Q begins after 20th March 2023, during the period which is 10 years before the date development under Class Q begins. The proposal complies.

(h) the development would result in the external dimensions of the building extending beyond the external dimensions of the existing building at any given point.

The development would not result in the external dimensions of the building extending beyond the external dimensions of the existing building at any given point. The proposal complies.

(i) the development under Class Q(b) would consist of building operations other than -

(i) the installation or replacement of -

(aa) windows, doors, roofs, or exterior walls, or

(bb) water, drainage, electricity, gas or other services, to the extent reasonably necessary for the building to function as a dwellinghouse; and

(ii) partial demolition to the extent reasonably necessary to carry out building operations allowed by paragraph Q.1(i)(i);

The development under Class Q(b) would not consist of building operations other than the installation or replacement of windows, doors, roofs, or exterior walls or water, drainage, electricity, gas or other services to the extent reasonably necessary for the building to function as a dwellinghouse; and partial demolition to the extent reasonably necessary to carry out building operations allowed by paragraph Q.1(i)(i). The proposal complies.

(j) the site is on article 2(3) land;

The site is not on article 2(3) land. The proposal complies.

(k) the site is, or forms part of -

(i) a site of special scientific interest;

(ii) a safety hazard area;

(iii) a military explosives storage area;

The site is not, nor does it form part of a site of special scientific interest, a safety hazard area or a military explosives storage area. The proposal complies.

(l) the site is, or contains, a scheduled monument; or

The site is not nor does it contain, a scheduled monument. The proposal complies.

(m) the building is a listed building.

The building is not a listed building. The proposal complies.

Conditions:

Q.2 - (1) Where the development proposed is development under Class Q(a) together with development under Class Q(b), development is permitted subject to the condition that before beginning the development, the developer must apply to the local planning authority for a determination as to whether the prior approval of the authority will be required as to -

(a) transport and highways impacts of the development

(b) noise impacts of the development

(c) contamination risks on the site

(d) flooding risks on the site

(e) whether the location or siting of the building makes it otherwise impractical or undesirable for the building to change from agricultural use to a use falling within Class C3 (dwellinghouses) of the Schedule to the Use Classes Order.

(f) the design or external appearance of the building and

(g) the provision of adequate natural light in all habitable rooms of the dwellinghouses

and the provisions of paragraph W (prior approval) of this Part apply in relation to that application.

Transport and Highways Impacts of the Development:

The site will be accessed using an existing vehicular access. The vehicular movements associated with one additional dwelling in this location will not result in increased conflict or danger to the highway network. In respect of car parking provision, Essex Parking Standards state a need for two spaces measuring 5.5m x 2.9m for dwellings with two bedrooms or more. The plans submitted demonstrate this can be achieved. Essex Highways Authority raise no objection to the development subject to conditions.

Noise Impacts of the Development:

The proposal would not result in any material noise impacts. The proposal complies.

Contamination Risks on the Site:

The Council's Environmental Protection Team have been consulted, and have stated that due to the site and surrounding areas historical use for agriculture they request a watching brief and that the Local Planning Authority are contacted in the event of unexpected ground conditions being encountered during construction. They also recommend conditions for construction working hours, no burning on site and control of dust emissions. Subject to the inclusion of these conditions, the proposal complies.

Flooding Risks on the Site:

The site is located outside of an area of recognised flood risk and the site lies entirely outside of areas of "Low", "Medium" and "High" risk of flooding from surface water. The proposal complies.

Whether the Location or Siting of the Building is Impractical or Undesirable for the Building to Change:

Paragraph: 109 Reference ID: 13-109-20150305 of the National Planning Practice Guidance states:

"When considering whether it is appropriate for the change of use to take place in a particular location, a local planning authority should start from the premise that the permitted development right grants planning permission, subject to the prior approval requirements. That an agricultural building is in a location where the local planning authority would not normally grant planning permission for a new dwelling is not a sufficient reason for refusing prior approval.

There may, however, be circumstances where the impact cannot be mitigated. Therefore, when looking at location, local planning authorities may, for example, consider that because an agricultural building on the top of a hill with no road access, power source or other services its conversion is impractical. Additionally the location of the building whose use would change may be undesirable if it is adjacent to other uses such as intensive poultry farming buildings, silage storage or buildings with dangerous machines or chemicals.

When a local authority considers location and siting it should not therefore be applying tests from the National Planning Policy Framework except to the extent these are relevant to the subject matter of the prior approval. So, for example, factors such as whether the property is for a rural worker, or whether the design is of exceptional quality or innovative, are unlikely to be relevant."

On this basis, the Local Planning Authority does not consider that the location or siting of the building would make it impractical or undesirable for the proposed change of use. The proposal complies.

The Design or External Appearance of the Building:

The design will see a conversion from the existing structure. However, the proposed changes involved are all minor works, with replacement of some materials and additional doors and windows. These would all be expected from such a proposal. Therefore the Local Planning Authority does not consider that the proposed development will have any significant impact on the design or external appearance of the building.

The Provision of Adequate Natural Light in all Habitable Rooms of the Dwellinghouses:

Habitable Rooms are defined as "any rooms used or intended to be used for sleeping or living which are not solely used for cooking purposes, but does not include bath or toilet facilities, service rooms, corridors, laundry rooms, hallways or utility rooms". Drawing number 22133-011 indicates that each habitable room will have adequate natural light.

Article 3 of The Town and Country Planning (General Permitted Development) (England) Order 2015 confirms that:

(9A) Schedule 2 does not grant permission for, or authorise any development of, any new dwellinghouse—

(a) where the gross internal floor area is less than 37 square metres in size; or

(b) that does not comply with the nationally described space standard issued by the Department for Communities and Local Government on 27th March 2015.

(9B) The reference in paragraph (9A) to the nationally described space standard is to that standard read together with the notes dated 19th May 2016 which apply to it.

The space standard deals with internal space within new dwellings and it sets out requirements for the Gross Internal (floor) Area of new dwellings at a defined level of occupancy as well as floor areas and dimensions for key parts of the home, notably bedrooms, storage and floor to ceiling height. The proposal is a 3 bedroom, 6 person single storey dwelling which requires a minimum of 95 square metres of gross internal floor space which includes built in storage of 2.5 square metres. From the plans submitted the proposal meets the requirements of Table 1 of the space standards and the Technical requirements.

8. Recommendation

Prior approval not required

9. Conditions

1 COMPLIANCE REQUIRED: COMMENCEMENT TIME LIMIT

CONDITION: Development under Class Q is permitted subject to the condition that development under Class Q(a), and under Class Q(b), if any, must be completed within a period of 3 years starting with the prior approval date.

REASON: In order to comply Schedule 2, Part 3, Class Q of The Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended).

2 APPROVED PLANS & DOCUMENTS

CONDITION: The development hereby permitted shall be carried out in accordance with the drawings/documents listed below and/or such other drawings/documents as may be approved by the Local Planning Authority in writing pursuant to other conditions of this permission or such drawings/documents as may subsequently be approved in writing by the Local Planning Authority as a non-material amendment following an application in that regard (except for Listed Building Consents). Such development hereby permitted shall be carried out in accordance with any Phasing Plan approved, or as necessary in accordance with any successive Phasing Plan as may subsequently be approved in writing by the Local Planning Authority prior to the commencement of development pursuant to this condition.

Drawing number 22133-011

REASON: For the avoidance of doubt and in the interests of proper phased planning of the development.

NOTE/S FOR CONDITION:

The primary role of this condition is to confirm the approved plans and documents that form the planning decision. Any document or plan not listed in this condition is not approved, unless otherwise separately referenced in other conditions that also form this decision. The second role of this condition is to allow the potential process of Non Material Amendment if found necessary and such future applications shall be considered on their merits. Lastly, this condition also allows for a phasing plan to be submitted for consideration as a discharge of

condition application should phasing be needed by the developer/s if not otherwise already approved as part of this permission. A phasing plan submission via this condition is optional and not a requirement.

Please note in the latest revision of the National Planning Policy Framework (NPPF) it provides that Local Planning Authorities should seek to ensure that the quality of approved development is not materially diminished between permission and completion, as a result of changes being made to the permitted scheme (for example through changes to approved details such as the materials used). Accordingly, any future amendment of any kind will be considered in line with this paragraph, alongside the Development Plan and all other material considerations.

Any indication found on the approved plans and documents to describe the plans as approximate and/or not to be scaled and/or measurements to be checked on site or similar, will not be considered applicable and the scale and measurements shown shall be the approved details and used as necessary for compliance purposes and/or enforcement action.

3 ONGOING REQUIREMENT: VEHICULAR PARKING

CONDITION: The proposed development shall not be occupied until such time as domestic car parking for two vehicles as shown on Drawing number 22133-011, with minimum dimensions of 2.9 metres x 5.5 metres per space has been provided. The vehicle parking area shall be retained in this form at all times. The vehicle parking shall not be used for any purpose other than the parking of vehicles that are related to the use of the development unless otherwise agreed with the Local Planning Authority.

REASON: In the interests of highway safety and to ensure adequate parking within the site is provided and maintained.

4 CONTAMINATION

CONDITION: In the event that contamination is found which was not previously identified, it shall be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment shall then be undertaken and, where remediation is necessary, a new Remediation Scheme shall be prepared and submitted to and approved in writing by the Local Planning Authority. Following completion of all necessary measures identified in such Remediation Scheme as may be approved, a verification report shall be submitted to and approved in writing by the Local Planning Authority. In such circumstances, no further works of development shall be carried out to that part of the site until such time as the requirements of this paragraph have been satisfied.

REASON: To ensure that any risks (to future users of the land and neighbouring land and to controlled waters, property and ecological systems) arising from any land contamination are minimised and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

5 COMPLIANCE REQUIRED

CONDITION: No vehicle connected with the development under Class Q shall arrive on site before 07:30 or leave after 19:00 (except in the case of emergency). Working hours to be restricted between 08:00 and 18:00 Mondays to Saturdays (finishing at 13:00 on Saturdays) with no working of any kind permitted on Sundays or any Public/Bank Holiday whilst construction works and alterations are being carried out.

No materials produced as a result of the site development or clearance shall be burned on site.

No dust emissions should leave the boundary of the site

REASON: to protect the amenities of neighbouring residential areas by ensuring that measures are implemented to avoid any nuisance.

10. Informatives

Essex Coast Recreational disturbance Avoidance & Mitigation Strategy

Under article 3(1) of the Town and Country Planning (General Permitted Development) (England) Order 2015 (the GPDO) permitted development rights are subject to regulations 75 to 78 of the Conservation of Habitats and Species Regulations 2017 (the 2017 Regulations). In particular, regulation 75 provides that it is a condition of any planning permission granted by a general development order on or after 30th November 2017, that development which is likely to have a significant effect on a European site or a European offshore marine site and is not directly connected with or necessary to the management of the site, must not be begun until the developer has received written notification of the approval of the Local Planning Authority (LPA) under regulation 77.

It has already been determined that where there is a net increase in residential dwellings within the Zone of Influence of protected European sites this will have a significant effect on those European sites through recreational disturbance within Tendring, and this has been identified as an issue for all of the Essex coastal Habitat sites through published Habitats Regulations Assessments. Therefore, where permitted development rights under the GPDO permit development which will result in a net increase in residential dwellings, article 3(1) of the GPDO and regulations 75 to 78 of the 2017 Regulations will apply.

Prior to the commencement of the development which is the subject of this prior approval determination an application must be made to the LPA under regulation 77 of the 2017 Regulations for the approval of the LPA before the development can be commenced. Mitigation has been agreed through The Essex Coast Recreational disturbance Avoidance & Mitigation Strategy (Essex Coast RAMS) to protect the integrity of these sites from this type of development, and a standard unilateral undertaking (UU) could secure payment to mitigate the harm arising from the development to the designated site before commencement. Please contact Tendring District Council to make an application under Regulation 77 of the 2017 Regulations and to arrange the required UU prior to commencement of the development.

Highways Informatives

1: All work within or affecting the highway is to be laid out and constructed by prior arrangement with and to the requirements and specifications of the Highway Authority; all details shall be agreed before the commencement of works.

The applicants should be advised to contact the Development Management Team by email at development.management@essexhighways.org

2: On the completion of the Development, all roads, footways/paths, cycle ways, covers, gratings, fences, barriers, grass verges, trees, and any other street furniture within the Site and in the area, it covers, and any neighbouring areas affected by it, must be left in a fully functional repaired/renovated state to a standard accepted by the appropriate statutory authority.

3: The Highway Authority cannot accept any liability for costs associated with a developer's improvement. This includes design check safety audits, site supervision, commuted sums for maintenance and any potential claims under Part 1 and Part 2 of the Land Compensation Act 1973. To protect the Highway Authority against such compensation claims a cash deposit or bond may be required.

Environmental Protection Informatives

ASBESTOS

Should any asbestos containing materials be present on the development site, or used within the original construction of the building in question, it must be safely removed by a qualified contractor, with relevant transfer notes being obtained to confirm safe and responsible removal and disposal to protect the health of site workers and end users.

FOUL DRAINAGE

The planning statement indicates a Sewerage Treatment Plant will be utilised as a way of disposing of foul waste. The installation shall be fully compliant with the Environment Agency's Binding Rules and any other relevant Government guidance and British standards, in respect of these systems. Information on this can be found at: Septic tanks and treatment plants: permits and general binding rules: The general binding rules - GOV.UK (www.gov.uk). It is strongly recommended these rules are complied with, as they will minimise any potential nuisance to nearby residential dwellings, assist in preventing a potential Public Health nuisance, and minimise the potential for adverse incidents, of which may result in formal enforcement action.

11. Equality Impact Assessment

In making this recommendation/decision regard must be had to the public sector equality duty (PSED) under section 149 of the Equality Act 2010 (as amended). This means that the Council must have due regard to the need in discharging its functions that in summary include A) Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act; B. Advance equality of opportunity between people who share a protected characteristic* (See Table) and those who do not; C. Foster good relations between people who share a protected characteristic* and those who do not, including tackling prejudice and promoting understanding.

It is vital to note that the PSED and associated legislation are a significant consideration and material planning consideration in the decision-making process. This is applicable to all planning decisions including prior approvals, outline, full, adverts, listed buildings etc. It does not impose an obligation to achieve the outcomes outlined in Section 149. Section 149 represents just one of several factors to be weighed against other pertinent considerations.

In the present context, it has been carefully evaluated that the recommendation articulated in this report and the consequent decision are not expected to disproportionately affect any protected characteristic* adversely. The PSED has been duly considered and given the necessary regard, as expounded below.

Protected Characteristics *	Analysis	Impact
Age	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Disability	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Gender Reassignment	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Marriage or Civil Partnership	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Pregnancy and Maternity	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Race (Including colour, nationality and ethnic or national origin)	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Sexual Orientation	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
Sex (gender)	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral

Religion or Belief	The proposal put forward will not likely have direct equality impacts on this target group.	Neutral
