2 APPROVED PLANS & DOCUMENTS

CONDITION: The development hereby permitted shall be carried out in accordance with the drawings/documents listed below and/or such other drawings/documents as may be approved by the Local Planning Authority in writing pursuant to other conditions of this permission or such drawings/documents as may subsequently be approved in writing by

the Local Planning Authority as a non-material amendment following an application in that regard (except for Listed Building Consents). Such development hereby permitted shall be carried out in accordance with any Phasing Plan approved, or as necessary in accordance with any successive Phasing Plan as may subsequently be approved in writing by the Local Planning Authority prior to the commencement of development pursuant to this condition.

REASON: For the avoidance of doubt and in the interests of proper phased planning of the development.

NOTE/S FOR CONDITION:

The primary role of this condition is to confirm the approved plans and documents that form the planning decision. Any document or plan not listed in this condition is not approved, unless otherwise separately referenced in other conditions that also form this decision. The second role of this condition is to allow the potential process of Non Material Amendment if found necessary and such future applications shall be considered on their merits. Lastly, this condition also allows for a phasing plan to be submitted for consideration as a discharge of condition application should phasing be needed by the developer/s if not otherwise already approved as part of this permission. A phasing plan submission via this condition is optional and not a requirement.

Please note in the latest revision of the National Planning Policy Framework (NPPF) it provides that Local Planning Authorities should seek to ensure that the quality of approved development is not materially diminished between permission and completion, as a result of changes being made to the permitted scheme (for example through changes to approved details such as the materials used). Accordingly, any future amendment of any kind will be considered in line with this paragraph, alongside the Development Plan and all other material considerations.

Any indication found on the approved plans and documents to describe the plans as approximate and/or not to be scaled and/or measurements to be checked on site or similar, will not be considered applicable and the scale and measurements shown shall be the approved details and used as necessary for compliance purposes and/or enforcement action.

- 3 **CONDITION:** No development shall commence above slab level until a scheme for the provision and implementation of water, energy and resource efficiency measures for the lifetime of the development shall be submitted to and approved, in writing, by the Local Planning Authority. The scheme shall include as a minimum:-

- An electric car charging point per dwelling;
- Agreement of a scheme for water conservation including greywater recycling and rainwater capture/re-use for new dwellings;

(If the applicant is unable to achieve this standard of connection, and can evidence through consultation that this would not be possible,

practical or economically viable an alternative superfast (i.e. will provide speeds greater than 30mbps) wireless service will be considered.)

The scheme shall be fully implemented prior to the first occupancy of the development unless otherwise agreed in writing by the Local Planning Authority. The scheme shall be constructed and the measures provided and made available for use as may be agreed and thereafter shall be maintained.

In any other case, please assume slab level to be the point before any walls and/or development can be visually above ground level or seek confirmation from the Local Planning Authority for your development.

The greatest threat to our planet is the belief that someone else will save it and also forgetting that small acts, when multiplied by millions of people, can transform the world. Developments will provide buildings/homes to thousands/millions of people over their lifetime. A well designed sustainable development in the beginning will restrict the contribution each person makes to that threat and help enable them to transform the world.
