Good Morning Kieran
Thank you for the information regarding costs.
I am now happy to sign off this concurrence.
Kind Regards
Mick

Hi Cllr Barry,

For ease, I have attached the quotation for your review. To note, the work required is a complete sand back of the fibre glass, reining it (building it back up), and then two coats of a specialised gel across 11 section of the slide and the stop board in the aqua catch area.

The attached also includes pictures; as such, you can see the wear and tear over the years. To note, this is standard work required on the Flume that will preserve its longevity without having to replace it in the near future or putting it out of action permanently.

Hope I have provided all the answers to your questions, let me know if you need anything else.

Many Thanks,
Kieran Charles

Good Afternoon Kieran
 Thanks for sending this through – would it be possible to have some breakdown of costs e.g simple material/labour allocation – just for my own information. Also what would be the timescale for repair and what guarantees would we have, if any?
 Kind Regards
 Mick

Subject: Walton On the Naze Lifestyles Flume (Slide)
Importance: High

Dear Cllrs,

I hope this email finds you well. It has been brought to my attention that there are remedial works required to the pool flume (slide) at Walton-on-the-Naze Lifestyles. This the only Centre in Tendring District Council's portfolio of sites which has both a separate teaching pool and a waterslide. The slide is regularly maintained and inspected by external specialist contractors. Due to the ageing condition of the waterslide we are now due some substantial works to ensure the integrity of the waterslide is maintained.

As such, this concurrence is to seek funds to complete remedial repairs where osmosis has caused the gel coat to crack leaving rough edges on 11 sections (inclusive of the stop board) within the waterslide. Additional repairs required within the teaching pool where brickwork is showing signs of chlorinated water damage to the structural column and pool lip. Both of these remedial repairs are required to ensure the integrity and longevity are not compromised so that facilities remain safe and operational.

This concurrence details the funding proposal and the works required. If you are in agreement with the attached letter, could you kindly return an email with your concurrence.

If you require any further information, then please do let me know.

Many Thanks,

Kieran Charles, BA Hons, MCIMSPA
