### NOTE/S FOR CONDITION:

The primary role of this condition is to confirm the approved plans and documents that form the planning decision. Any document or plan not listed in this condition is not approved, unless otherwise separately referenced in other conditions that also form this decision. The second role of this condition is to allow the potential process of Non Material Amendment if found necessary and such future applications shall be considered on their merits. Lastly, this condition also allows for a phasing plan to be submitted for consideration as a discharge of condition application should phasing be needed by the developer/s if not otherwise already approved as part of this permission. A phasing plan submission via this condition is optional and not a requirement.

Please note in the latest revision of the National Planning Policy Framework (NPPF) it provides that Local Planning Authorities should seek to ensure that the quality of approved development is not materially diminished between permission and completion, as a result of changes being made to the permitted scheme (for example through changes to approved details such as the materials used). Accordingly, any future amendment of any kind will be considered in line with this paragraph, alongside the Development Plan and all other material considerations.

Any indication found on the approved plans and documents to describe the plans as approximate and/or not to be scaled and/or measurements to be checked on site or similar, will not be considered applicable and the scale and measurements shown shall be the approved details and used as necessary for compliance purposes and/or enforcement action.

## 3 ONGOING REQUIREMENT IMPOSED: LEVEL OF ILLUMINATION

**CONDITION:** The maximum luminance of the sign/s shall not exceed 300 candelas/m<sup>2</sup> at night and 2500 candelas/m<sup>2</sup> during the day.

**REASON:** Any luminance in excess of this level would cause harm by reason of being detrimental to the prevailing character of the area, residential amenity, biodiversity and possible distraction to highway users.

**NOTE/S FOR CONDITION:**

Candelas/m<sup>2</sup> (cd.m<sup>2</sup>) is a measure of light emitted per unit area, this unit is frequently used to specify the brightness of a display device. For example, most consumer desktop liquid crystal displays have luminance of 200 to 300 cd/m<sup>2</sup>. A HDR television display can range from 450 to up to 1600 cd/m<sup>2</sup>

**4 ONGOING REQUIREMENT IMPOSED: FLASHING/INTERMITTENT ILLUMINATION**

**CONDITION:** There shall be no flashing, intermittent or recurring form of illumination to take place at any time to highlight the advertisement/s.

**REASON:** These forms of illumination would cause harm because the intermittent display would distract drivers and pedestrians likely to result in detriment to highway safety.

**NOTE/S FOR CONDITION:**

For the avoidance of doubt, this condition applies to both internal lighting and external lighting sources to highlight the advertisement and any light type and source.
