

Officer Report

13 January 2025

The proposal to reduce the conifer the Holm Oak and the Wisteria in size is reasonable and necessary in order to control these trees at a size and scale proportionate to their location .

The removal of the two Laburnum is acceptable as the trees are growing between an existing Griselinia and the conifer marked as tree one on the application form.

The proposed works will not adversely affect either the character or appearance of the conservation area.

Decision - No objection
